

# Electric lifting platform

## Purpose and scope of application:

It is used to move a variety of goods between points of destination. During the operation of electric lift platforms, there are no harmful emissions, which makes it possible to use them in enclosed spaces.

## Functionality:

The new operator's compartment provides easy access to all controls, excellent visibility and ease of operation. The design of the lifting platforms allows the use of various unloading devices for special cargo handling.

## Technical characteristics

Parameters.	Meaning.		
Power supply voltage, V	48		
Turning radius, mm	3200		
Carrying capacity, t	1000	2000	3000
Electric motor power, kW	2,4	3,6	5,0
Overall dimensions*, mm	2270x1060	3300x1310	3300x1310
Weight, kg	1700	2750	3800

Equipment:

1. Pneumatic or ultra-elastic tires;
2. Lighting (for reversing, for warning) of the cab additionally, side side panels, canopies, straps for securing cargo.

It is possible to make changes to the equipment at the request of the client. A suitable model can be manufactured in various versions.
