

# Loads

## DuoPower

Recommended loads<sup>1)</sup> for a single anchor.

The given loads are valid for wood screws with the specified diameter.

<sup>1)</sup> Required safety factors are considered. Valid for installation and use in dry base material for temperatures in the substrate up to +24 °C (resp. short term up to +40 °C).

<sup>2)</sup> Valid for tensile load, shear load and oblique load under any angle.

<sup>3)</sup> Load determination on plastered wall.
