

training cup

# training cup

Lets little kids drink like big kids. The training cup is the ideal way for kids to learn to drink from a cup. The training cup mimics the flow of a big kids cup, by funnelling liquids into the rim for easy free-flow drinking. The cup also features a unique water window in the lid so kids can learn to see water as they're drinking and judge how much to tilt their cup. Interchangeable base and lid means you can switch between the spout, sippy cup and training lids as baby grows.

window  
lets kids  
judge  
water level

Start off bubs with less liquid so they can see the liquid moving around, and better judge how much to tilt the cup. Then gradually increase the level of liquid as bubs gets more confident and skilled.

unique lid  
funnels water  
to rim for  
easy free  
flow drinking
