

## Electrothermal actuator for zone valves and terminal units

MODEL	POWER SUPPLY	CONTROL
MVX22R	110-230 V AC	ON/OFF
MVX42R	24 V AC/DC	
MVX52	24 V AC	Proportional 0-10 V

### APPLICATION AND USE

MVX electrothermal actuators can be used with Micra® and Micra® Kvs 4-6 valves (DBL199en and DBL293en).

### OPERATION

The actuator-valve assembly is easily made thanks to its threaded ring nut, which allows a comfortable cable positioning. All models are provided with a yellow stroke indicator (see below).

The actuators are available in the ON-OFF (230 V and 24 V) and in modulating (24 V) with 0-10 V DC signal versions.

### OPTIONS

**PS107** actuator with M28x1,5 modified ring nut. For ordering add suffix PS107 to standard codes.

### SAFETY PERSCRIPTIONS

#### 230 V products

- Install on the power supply line a screening device to avoid short circuits (fuse or magneto-thermic) according to the reference standards.
- In case of actuator removing from skilled staff, be sure that the power supply is disconnected.
- products are maintenance free.
