This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

Warning-To reduce the risk of injury, user must read instructions manual carefully.

INSTRUCTIONS FOR USE

1. It is not recommended to cut sweet potatoes and tomatoes. You can cut potatoes, cucumbers, carrots, zucchini, onions, etc.
2. When cutting onions, it is recommended to cut off the ends and hard skin first before putting them into the machine.
3. It is not recommended to put the machine or accessories such as the cutter head into the dishwasher for cleaning or soaking for a long time.

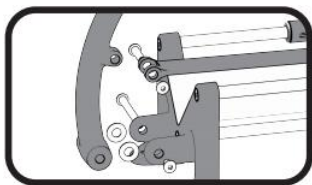

Proper usage not only avoids the awkwardness of potato jams but also prolongs the blade's service life.

Correct usage methods can lengthen the blade's lifespan, make potato cutting easier.

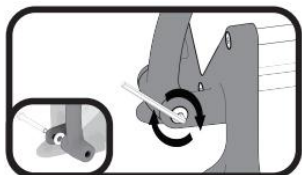

Tips for extending the blade's service life:

1. Cutting the potato into two pieces will make it easier to cut.
2. Align the potato's small end with the blade and the big end with the tail to make the pushing more even.

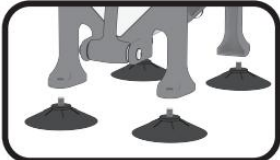

ASSEMBLY INSTRUCTION

Put the washers in position and line up all the holes from handle and main body

Make sure the washers have been located inside of connecting arm then insert the dual screw into holes and tight them with Allen wrench

	<p>Put assembled onto suction cup and tighten the nut by clockwise</p>
	<p>Land the cutter with its legs on horizontal surface and use appropriate bolt (buy separately) to fix it</p>
	<p>Make sure the cutter is mounted onto a solid wall and use appropriate bolt (buy separately) to fix it</p>

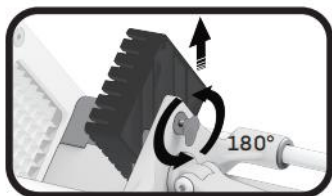

DO NOT HOLD ONTO POTATO WHILE PULLING THE HANDLE

CLEAN AND REPLACE THE CUTTER

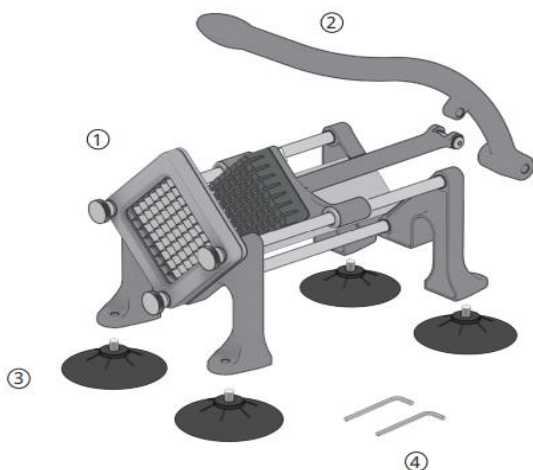

NOTE: The cutter head and pusher head need to be replaced to match, and make sure the push head and the cutter head are centered before tightening the screws

	<p>Take out the cutting blades after removing the nuts then handwash the blades by water with brush</p>
---	---

Rotate the quick releaser 180° and pull out the pushing block vertically then handwash it with brush

COMPONENT LIST

	DESCRIPTON	QUANTITY

④	Allen Wrench	2

NOTE OF CAUTION

Keep fingers away from blades

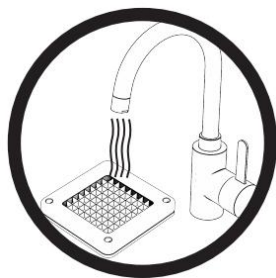

Do not operate when it's unsteady

Do not use frozen potato

Do not use oversize potato

Wash food-contact parts before
and after use

Damage part check before use

KEEP OUT OF REACH OF CHILDREN

Reasons for potato jams and solutions:

1. The potato is too large, insufficient force or an incorrect exertion posture may cause it to jam.
2. After the potato gets stuck, locate the jammed part and cut it out with a knife, then push the potato out.

Try several times, and believe that this little dog will become your excellent partner.
