### - Wiring Installation

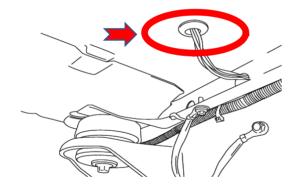

Before installation, the fuse on the installation is removed from the place. !!!!

Wiring and control unit installation is made in the compartment under the front passenger seat.

For connections of the installation under the vehicle, the installation is taken from the hole under the front passenger seat to the underside of the vehicle.

\*\* In vehicles that do not have holes, drilling must be done to pass the installation.

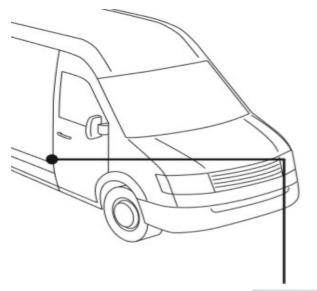

Ø38mm punch ile delme işlemi yapılır. 4

6

# - Wiring Installation

Middle and front door switch connections are made to the region seen in the picture.

For switch mounting, Ø 11 mm hole is drilled.

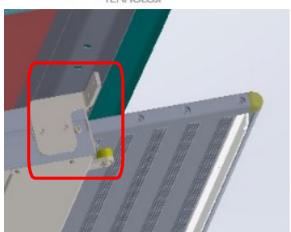

With the smart mounting screw, the assembly is done.

7

Veldo SSH 2019

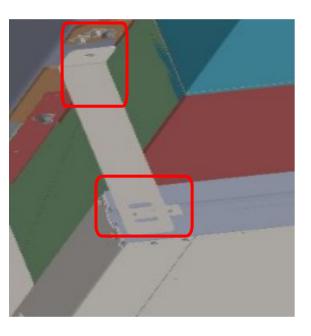

For the front carrier foot connection, the vehicle's original chassis hole is used.

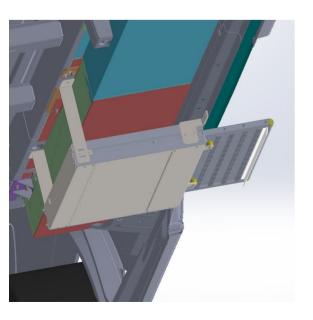

For the rear carrier foot connection, the vehicle's original chassis hole is used.

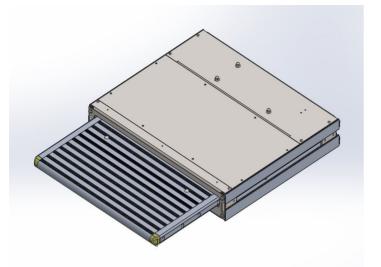

The completed version of the front and rear carrier foot connection is as in the picture.

## - New Feature

If the step is opened and does not close (due to any faults or factors)

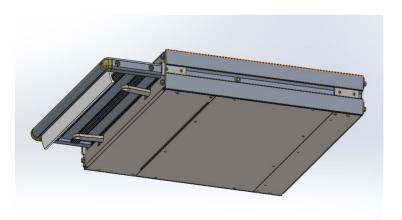

The connecting U\_clips of the feet below the Step are removed by hand.

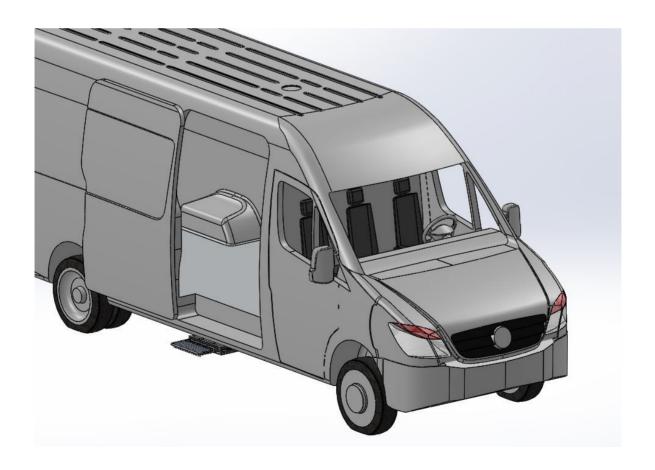

The step that remains open can be closed by hand by removing the  $U_{clips}$ .

### - Final Control

When starting installation, replace the fuse that we have removed from the installation. After replacing the fuse, check the step operation.
