Note: Use of this equipment to pump other than approved fluids will void the manufacturing warranty

Warning : Never operate the pump near fire or source of spark. Some media may be explosive & dangerous to pump

TROUBLESHOOTING:

Sr. Nr.	PROBLEM	CAUSE	REMEDY
1	Pump does not dispense fluid	Pump not able to create adequate suction	Prime pump . Follow Step 7 above
		Pumps is drawing in air , instead of fluid	Tighten all connections of suction tube & of the suction tube with pump inlet
		Suction tube inlet is blocked	Remove suction tube & clean strainer at tube inlet
2	Leakage of media from the crankshaft	Damaged seal due to use with media not suitable for use with pump	Replace seal with genuine replacement seal from manufacturer
