TABLE OF CONTENTS

FIBER LASER CUTTING MACHINES

Co₂ LASER CUTTING MACHINES

OTHER LASER MACHINES

MARKING LASER MACHINES

UV PRINTING MACHINES

SOLVENT PRINTING MACHINES

SUBLIMATION PRINTING MACHINES

Metal Pipe laser cutter

- ◆ The equipment has a fully automatic loading rack, which saves time and labor, easy to operate
- ◆ The efficiency is 5 to 6 times that of ordinary pipe cutting machines
- ◆ The blind area of tailings is small, saving materials and reducing post-processing
- ◆ The length of the remaining tailings cut by the equipment can be arbitrarily controlled, even zero, which greatly saves material loss
- ◆ Follow-up cutting (optional): standard integrated height adjuster, which can easily handle deformed pipes

Machine model	G120CL/G170CL
Laser source	1500-3000W
Pipe diameter	10-120mm/10-170mm
Repeatability	±0.02
Pipe processing range	~6250mm

More information can be found on our website www.truebluemedi.eu

JZ-1530 Enclosed fiber laser with exchange platform

- ◆ High stability, using the world's top imported laser source, stable performance, the service life of key components can reach 100,000 hours, free laser maintenance.
- ◆ The cutting speed is fast, the efficiency is high, the operation and maintenance of the product are convenient, and the optical fiber transmission does not need to adjust the optical path
- ◆ Imported servo motor and guide rail drive mechanism are adopted, with high cutting precision.

Machine model	JZ-1325/JZ-1530
X/Y Reposition formats	±0.02mm
Laser power	3000W-20000W
Laser source	MAX/RAYCUS/IPG
Supported file formats	DXF,autoCAD,CDR

More information can be found on our website www.truebluemia.eu

JZ-PLATE and tube fiber laser

- ◆ One machine both for tube and plate cutting, which saves the cost of purchasing two sets and saves more than 50% of the space
- ◆ Full servo control is adopted to effectively ensure the cutting precision of machine. The pneumatic chuck clamps and automatically adjusts the center, and the maximum speed can be 90m/min, which effectively improves the cutting efficiency.
- ◆ The unique cross-region design of the beam makes the overall size of the machine smaller, requires less space, and saves the cost of production space to a greater extent.

Machine model	JZ-1325/JZ-1530
X/Y Reposition formats	±0.02mm
Laser power	1500W-8000W
Operating voltage	AC 380V 50Hz/60Hz
Supported file formats	DWD,DXF,JPGE,PCX,AI,TIFF,PLT,CDR,BMP

More information can be found on our website www.truebluemedi.eu

JZ-1530 High precision full servo fiber laser

- ◆ Double-drive gantry gear and rack drive; imported linear guide; stable transmission and high precision.
- ◆ The X, Y, and Z axes are analyzed by finite element simulation to achieve high rigidity, high precision, high speed, and high acceleration; improve the effective efficiency of the product
- ◆ Follow-up dust removal system, the cutting areas are independent of each other, which effectively removes a large amount of dust generated during cutting, and provides a good working space for production
- ◆ Equipped with a roller feeding device, the feeding of the upper sheet becomes easy

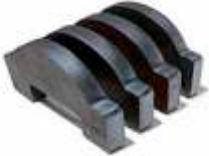

Machine model	JZ-1325/JZ-1530
X/Y Reposition formats	±0.02mm
Laser power	1500W-12000W
Machine working speed	0-60m/min
Supported file formats	DXF,AI,PLT,LXD,Gerber,NC

More information can be found on our website www.truebluemia.eu

TRUE
Blue Media

JZ-1530E High precision full servo fiber laser

- ◆ Dual-drive gantry gear and rack drive, original imported linear guide, smooth transmission and high precision.
- ◆ The X, Y, and Z axes are analyzed through finite element simulation to achieve high rigidity, high precision, high speed, high acceleration to improve efficiency
- ◆ Japanese Yaskawa motor or Taiwan Delta motor, it has high precision, no step loss, high torque and low noise.
- ◆ Machine with independent display device, real-time monitoring, automatic tracking, stable operation and convenient operation,

 **JZ INDUSTRY**

Machine model	JZ-1325E/JZ-1530E
X/Y Reposition formats	±0.02mm
Laser power	1500W-12000W
Machine working speed	0-60m/min
Supported file formats	DXF,AI,PLT,LXD,Gerber,NC

More information can be found on our website www.truebluemedi.eu

JZ-1325MS Ball screw system laser cutting machine

- ◆ It is rack transmission, and the grinding grade rack with DING precision level is used, which has higher precision and better stability than traditional belt transmission.
- ◆ The overall structure of the bed is welded by 100mm square pipes, and the Y-axis guide rail is creatively laid directly on the structural surface of the bed. The thickness of the structure is 10mm, and it is finished by gantry finishing.
- ◆ The constant optical path with 5 reflectors is used, no matter where the laser head moves, it will always remain the same.
- ◆ Follow-up ventilation and partition ventilation, follow-up ventilation can absorb smoke and dust generated during the working process of the laser head according to the moving range of the gantry. Partition ventilation can be opened at fixed points according to the working area Or close the air duct so that the fan can absorb smoke and dust to the maximum extent.

Machine model	JZ-1325MS/JZ-1530MS/JZ-2030MS
X/Y Reposition formats	±0.05mm
Laser power	60W-500W Double or four heads for options
Machine working speed	0-500mm/s
Control system	RD Laser control system

More information can be found on our website www.truebluemedia.eu

JZ-1310 Servo system laser cutting machine

- ◆ Machine with ball screw system, higher precision, higher speed
- ◆ The laser head can be fine-tuned according to different thick materials. The aluminum alloy adjustable laser head is lighter than other metal laser heads, which can reduce the inertia error when the laser head moves, and the laser device is stable and easy to maintain low cost.
- ◆ Use Taiwan Hiwin square guide rail, made of high-strength special steel, to ensure that the laser machine will not be deformed for a long time, and improve the accuracy of the laser machine.
- ◆ Compared with the aluminum pulley, the copper pulley has higher hardness, better wear resistance and longer service life
- ◆ A variety of high-quality laser tubes are available, EFR, RECI, high efficiency and stability, and a service life of 10,000 hours.

Machine model	JZ-1310
Working Area	1300*1000mm
Laser power	60W-500W Double or four heads for options
Operating voltage	AC 220V 50Hz/60Hz
Control system	RD Laser control system

More information can be found on our website www.truebluemedi.eu

JZ-1390 Co2 laser cutting machine

- ◆ The laser head can be fine-tuned according to different thick materials. The aluminum alloy adjustable laser head is lighter than other metal laser heads, which can reduce the inertia error when the laser head moves, and the laser device is stable and easy to maintain low cost.
- ◆ Use Taiwan Hiwin square guide rail, made of high-strength special steel, to ensure that the laser machine will not be deformed for a long time, and improve the accuracy of the laser machine.
- ◆ Compared with the aluminum pulley, the copper pulley has higher hardness, better wear resistance and longer service life.
- ◆ A variety of high-quality laser tubes are available, EFR, RECI, high efficiency and stability, and a service life of 10,000 hours.

Machine model	JZ-6090/JZ-1390/JZ-1410/JZ-1610
Working Area	600*900/1300*900/1400*1000/1600*1000
Laser power	60W-500W Double or four heads for options
Operating voltage	AC 220V 50Hz/60Hz
Control system	RD Laser control system

More information can be found on our website www.truebluemedia.eu

JZ-1410 Laser with up and down table

- ◆ Assemble the working table with a 3.0mm sheet metal which made trough bending process, the hardware assembly is not deformed, the fit is good, and it is suitable for long-term work
- ◆ The synchronous wheel is made of brass, which is more durable than the aluminum wheel
- ◆ Optical fiber cutting, one-time molding processing table (knife rack), small error and low deformation.
- ◆ The switching power supply uses Taiwan Mcanwell, with stable output and anti-interferen

Machine model	JZ-6090/JZ-1390/JZ-1410/JZ-1610
Working Area	600*900/1300*900/1400*1000/1600*1000
Laser power	60W-500W Double or four heads for options
Operating voltage	AC 220V 50Hz/60Hz
Control system	RD Laser control system

More information can be found on our website www.truebluemedi.eu

JZ-1810 Textile laser cutting machine

- ◆ The new horizontal and vertical intelligent camera control system, visual color screen operation panel, can simultaneously display the graphics to be cut.
- ◆ Equipped with CCD visual positioning system, automatic positioning and cutting.
- ◆ The drive can be controlled to automatically open and feed materials more easily and conveniently, saving labor and improving efficiency.
- ◆ The built-in industrial cooling water system reduces the occupied space.

Machine model	JZ-1410/JZ-1610/JZ-1810/JZ-1812
Working Area	1800*1000-1400/1900*1600-2000
Laser power	80W-150W Double or four heads for options
Operating voltage	AC 220V 50Hz/60Hz
Control system	RD control

More information can be found on our website www.truebluemedia.eu

JZ-1313 Metal & non-metal laser

- ◆ 1500W~3000W laser source for option;
- ◆ Optional Co2 laser tube 80W-400W is available;
- ◆ Equipped with well-known brand industrial systems, metal cutting heads and non-metal cutting heads, one machine with two heads, can easily switch between metal cutting or non-metal cutting with one click;
- ◆ Equipped with triangular iron blade and aluminum blade table, professional for metal and non-metal cutting;
- ◆ XYZ axis with imported screw module, imported servo system, high precision, high stability, long life, industrial tempering, gantry precision milling machine body, high stability, no deformation after long-term use.

Machine model	JZ-1313/JZ-2020
Fiber laser power	1500W-3000W
Laser power	80W-450W
Operating voltage	AC 220V 50Hz/60Hz
Control system	AU3TECH

More information can be found on our website www.truebluemedi.eu

JZ-Hand held fiber laser cleaning machine

- ◆ Intelligent protection system, mobile terminal APP and PC terminal monitoring, real-time feedback of working status.
- ◆ High threshold optical components, better cleaning effect.
- ◆ A variety of safety locks with higher safety performance.
- ◆ The water-cooled design of the whole body is stable and can support long-term work.

Machine model	JZ-1500W/JZ-2000W/JZ-3000W
Fiber laser power	1500W-3000W
Laser type	CW fiber laser source
Operating voltage	AC 220V/AC380V 50Hz/60Hz
laser wev elength	1060nm-1070nm

More information can be found on our website www.truebluemia.eu

JZ-Hand held fiber laser welding machine

- ◆ The internal design is smart and the weld seam width is large, which solves the disadvantage of laser welding spot, and the weld seam is well formed.
- ◆ Lightweight shape, comfortable grip, easy to grasp with one hand, easy to operate
- ◆ It has a safety alarm, and automatically locks the light after removing the workpiece, with high safety.
- ◆ The welding seam is beautiful, the speed is fast, no consumables, no discoloration, and no post-polishing.
- ◆ Various angle nozzles can be configured to meet the welding needs of different products.

Machine model	JZ-1500W/JZ-2000W/JZ-3000W
Fiber laser power	1500W-3000W
Laser type	CW fiber laser source
Adjustable format	0.2-5mm
laser wev elength	1060nm-1070nm

More information can be found on our website www.truebluemedia.eu

MAX RAYCUS 20W/30W/50W/100W

- ◆ It can process all metal and some non-metal materials. It is especially advantageous for marking high hardness, high melting point, and brittle materials.
- ◆ It belongs to non-contact processing, no damage to products, no tool wear, and good marking quality.
- ◆ The laser beam is thin, the consumption of processing materials is small, and the processing heat-affected zone is small.
- ◆ High processing efficiency, computer control, easy to realize automation.

Machine model	JZ-20W/JZ-30W/JZ-50W/JZ-100W
Marking area	110x110mm/150x150mm/200x200mm/300x300mm
Marking depth	0.01-1.0mm (depending on the material)
Cooling system	Air cooling
Laser repetition rate	20KHz-80KHz

More information can be found on our website www.truebluemedia.eu

Co2 Laser marking machine

- ◆ High marking precision, fast speed.
- ◆ The laser power is high, which can be applied to engraving and cutting of various non-metallic products.
- ◆ No consumables, low processing cost, and the operating life of the laser is as high as

Machine model	JZ-30W/JZ-35W/JZ-60W
Marking area	110x110mm/150x150mm/200x200mm/300x300mm
Marking depth	<3mm according to material
Cooling system	Air cooling
Power supply	AC220V ±10%, 50Hz 110V (option)

More information can be found on our website www.truebluemedia.eu

UV Laser marking machine

- ◆ The output laser spot is smaller and the marking lines are thinner, which is more suitable for some finer graphic marks.
- ◆ The beam quality is good, the output laser is stable, and the marking effect is easy to debug.
- ◆ The laser frequency is high, and the marking speed is faster.
- ◆ The whole machine has stable performance, small size and low power consumption.

Machine model	JZ-3W/JZ-5W/JZ-10W/JZ-15W
Marking area	110x110mm/150x150mm/200x200mm/300x300mm
Marking depth	<3mm according to material
Marking speed	0-5000mm/s
continuous working time	24h

More information can be found on our website www.truebluemedia.eu

PRINTERS

YF-X2513 Meglev UV Flatbed Printer

- ◆ Ricoh Gen6 Print Head
- ◆ Automatic height detection system.
- ◆ Anti-collision system.
- ◆ Intelligent constant temperature ink system.
- ◆ LED UV water cooling system higher performance, lower energy consumption.
- ◆ Intelligent ink level alarm system.

Print head	Ricoh Gen6 Industrial Grayscale Print Head				
Print head number	2-9				
Print mode	4C/6C. 4C/6C+W. 4C/6C+W+V. 2*4C/6C+W, 3*4C, 4*4C

More information can be found on our website www.truebluemedia.eu

YF-3220G Meglev UV Flatbed Printer

- ◆ Ricoh Gen6 Print Head.
- ◆ Precision 40% higher.
- ◆ Speed is 100% faster than G5.
- ◆ Use LED cooling system.
- ◆ Longer service life and lower energy consumption.
- ◆ High precision automatic height detection system.
- ◆ Maximum speed up to 2000mm/s.
- ◆ Imported magnetic levitation motion module.

Print head	Ricoh Gen6 Industrial Grayscale Print Head				
Print head number	2-9				
Print mode	4C/6C.4C/6C+W.4C/6C+W+V, 2*4C/6C+W, 3*4C, 4*4C, 5%4C, 6x4C

More information can be found on our website www.truebluemedia.eu

YF-1610 UV Flatbed Printer

- ◆ Using Ricoh Gen 6 and Ricoh Gen 5 industrial printhead, high precision and stable output.
- ◆ High-precision automatic height detection system and high-sensitive anti-collision system.
- ◆ White&Color&Varnish syn output.
- ◆ Use Photoprint RIP software to process multiple orders and maintain color uniformity.
- ◆ The highest printing height is 15CM, widely used in personalized customization and crafts.

YF-3200Z UV Roll To Roll Printer

- ◆ A variety of printhead configuration, Ricoh, Konica.
- ◆ Installed with four large diameter rubber rollers to ensure that material is not easy to wrinkle and run off.
- ◆ Imported dual linear mute guides make less noises during printing.
- ◆ Industrial-grade heavy-duty structure design, more simple and stable.
- ◆ 5/8 support points are used to balance the rubber roller to ensure stability.

Print head		Ricoh Gen6	Ricoh Gen5

More information can be found on our website www.truebluemedia.eu

YF-1704/2004 UV Printer

- ◆ Adopt Epson print head
- ◆ Adjustable carriage height (< 8mm), convenient for customers to print various materials.
- ◆ Automatic lifting and cleaning station, large capacity buinkl sykste m (automatic cleaning sealed print head, make the head always in good condition).
- ◆ Wide anti-statpiincch roller, supeffronwt iheatdinge arc.
- ◆ Constanttension high-precision feeding system to ensure accurateand stable feeding.
- ◆ Scientific operation interface, convenient to operate.
- ◆ LED curing system, more energy-saving, longer life, the printed materials are not affected by temperature.
- ◆ Aluminum alloy integrated cleaning station.
- ◆ White ink mixing system.
- ◆ Imported mute rail, aluminum beam, guarantee high stability and high quality output.

YF-X1701/02 Eco Solven Printer

- ◆ Epson13200 Printhead.
- ◆ Anti-collision system.
- ◆ Adjustable head height (≤20mm).
- ◆ Imported mute rail and servo integrated motor.
- ◆ Big capacity bulk ink system.
- ◆ High-power integrated drying fan.
- ◆ Scientific operation interface, easy to operate.
- ◆ New variable ink drop technology and three feathering print functions make the print picture more realistic and delicate.

YF-X1704 4/8 Color Printer

- ◆ Epson13200 Printhead.
- ◆ Anti-collision system.
- ◆ Adjustable head height ($\leq 20\text{mm}$)
- ◆ Imported mute rail and servo integrated motor.
- ◆ Big capacity bulk ink system.
- ◆ High-power integrated drying fan.
- ◆ Scientific operation interface, easy to operate.
- ◆ New variable ink drop technology and three feathering print functions make the print picture more realistiancd delicate.

- ◆ Industrial grade all steel print head, 110V high frequency injection, which is installed internal ink circulation, internal metal instruction. It can be disassembled for cleaning and component replacement, with 8 years lifetime extremely low maintenance costs. Leading color saturation & precision.
- ◆ Adopted double linear guide, all-aluminum finned-mulmlin g beam, high-precision frame, platform and patented carriage manufacturing, realizing the true trinity precision, ensuring the precision of machine printing.
- ◆ Independent color separation print head heating system, industrial grade negative pressure system, coupled with automatic ink circulation technology of the print head to ensure ink fluency, effectively prevent the ink breakage caused by, i ing temperature different, which greatly saves the cost of the customer's use and has truly achieved uninterrupted printing.
- ◆ Heavy-duty structure design, more simple and stable.

YF 1704/2004 Sublimation Printer

- ◆ Adopt Epson print head
- ◆ Adjustable carriage height (<8mm), convenient for customers to print various materials.
- ◆ Automatic lifting and cleaning station, large capacity bulk ink system, (automatic Cleaning sealed print head, make the head always in good condition).
- ◆ Wide anti-static pinch roller, super wide front heating arc.
- ◆ Constanttension high-precision feeding system to ensure accurateand stable feeding.
- ◆ Scientific operation interface, convenient to operate.
- ◆ Led curing system, more energy-saving, longer life, The printed materials are not affected by temperature.
- ◆ Aluminum alloy integrated cleaning station.
- ◆ White ink mixing system.
- ◆ Imported mute rail, aluminum beam, guarantee high stability and high quality output.
