

Progress Labs Vitamin D3 8000 IU - 240 Tablets

Progress Labs Vitamin D3 8000 IU is a high-potency dietary supplement designed to support overall health and well-being. Each tablet provides 8000 IU of vitamin D3 derived from lanolin, ensuring premium quality and maximum efficacy. Ideal for individuals with limited sun exposure or increased vitamin D requirements.

General Product Information

Vitamin D3, also known as cholecalciferol, is essential for maintaining healthy bones, teeth, and immune function. Its primary role is to enhance calcium and phosphorus absorption in the body, preventing deficiencies that can lead to weakened bones and other health issues. Regular supplementation can also improve mood and energy levels, contributing to an overall better quality of life.

Key Benefits

- Enhances calcium and phosphorus absorption for stronger bones and teeth.
- Boosts immune system functionality to combat infections.
- Supports muscle health and reduces age-related weakness.
- Contributes to mood regulation and alleviates fatigue symptoms.
- Non-GMO, gluten-free, and produced under clean-label standards.

Usage Instructions

Take 1 tablet daily, preferably with a meal. This product is intended for adults, particularly those over the age of 75 or individuals with limited sun exposure. Do not exceed the recommended dose.
