HARDWAX

Hard Wax Stick

DESCRIPTION:

The hard wax stick is a revolutionary product for instant and invisible recovery of any solid or synthetic wood surface.

It has many characteristics that make it an ideal product such as good adhesion for an easier application, a good plasticity, and a noticeably hardness on touch.

The product is compatible with any follow on work.

Colours are light resistant.

PHYSICAL – CHEMICAL CHARACTERISTICS:

Appearance :	solid
Colour :	conforms to label
Odour :	typical
Flammability point :	> 150° C
Density :	0.94/cm³ at 20° C
Activity substance :	100%

USE:

Before applying the product , clean carefully the area of chipped and notched wood.

With the aid of a solder, heat the product directly in the imperfection until it has filled up.

After a few moments when the product has cooled down and fixed, take off any excess product with the use of a spatula or wire wool.

If needed varnish over or re touch up.

PACKAGING:

The product comes in a stick and is packed in wooden or plastic boxes of 10 pieces.

STORAGE:

The product must be kept away from heat sources, preferably stored at room temperature.

WARNING:

Our data sheets are prepared on the basis of average performance of our tests. However, our technical advices are given in good faith but without any warranty. In fact different supports, conditions of application, industrial plants, dilutions are determinant for the final result, and are often beyond our control. The user must try the product to see if it is suitable for his needs. We will ensure the continuity of the chemical-physical characteristics.
