Model z tektury do samodzielnego montażu

skala
1:12

w zestawie:

9 formatek z tektury modelarskiej 1,5mm
wycinane i grawerowane laserowo

INSTRUKCJA / MANUAL

Wszystkie elementy w instrukcji dotyczą modelu Fiat 126p ST (Standard) w początkowych latach produkcji.

Mogą występować drobne różnice w kształcie poszczególnych elementów.

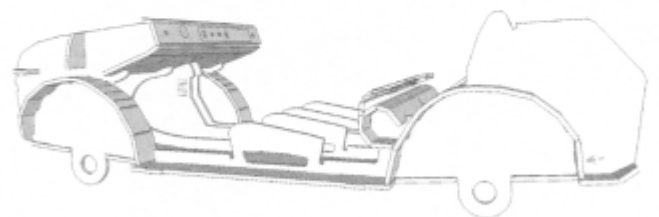

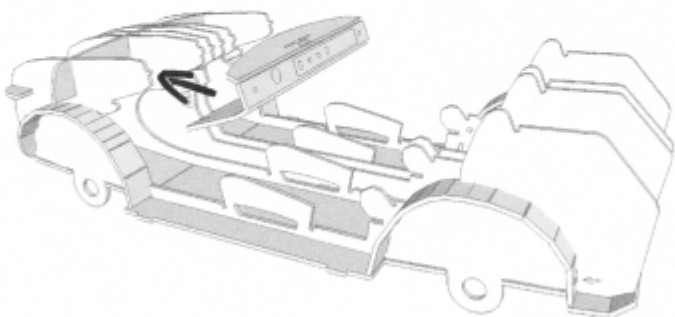

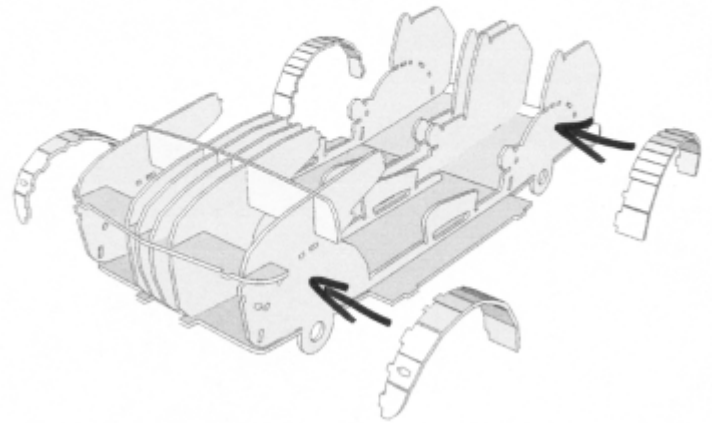

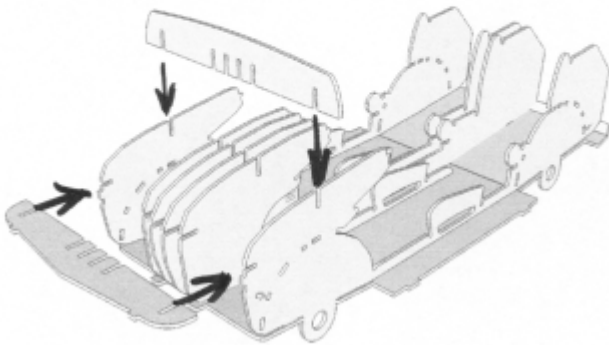

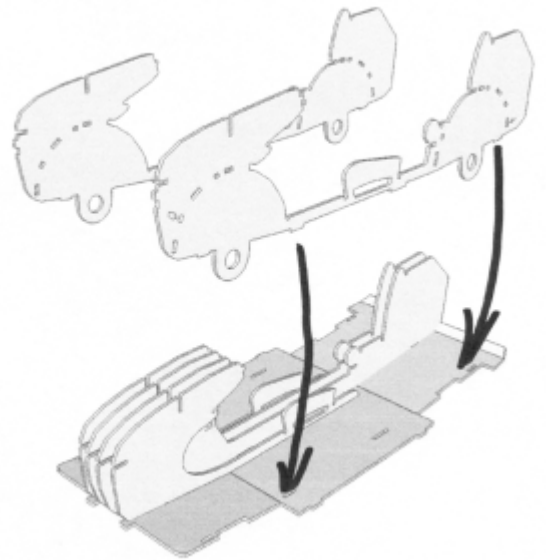

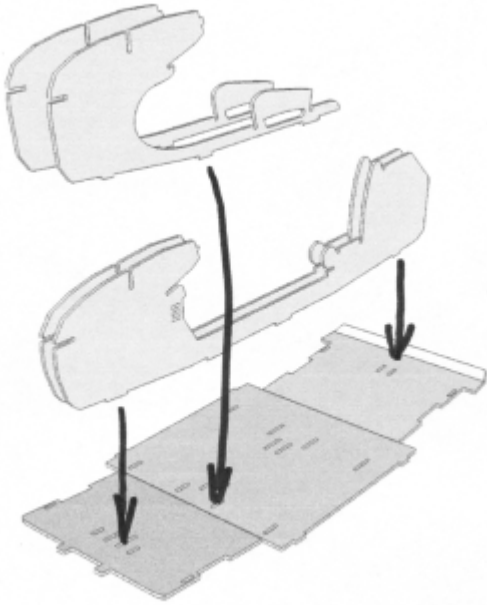

Nie wpływa to jednak na bryłę pojazdu oraz na kolejność składania

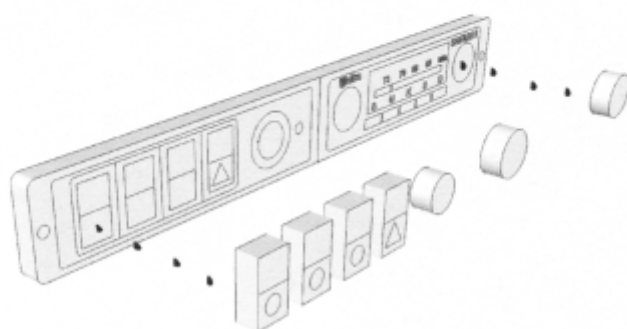

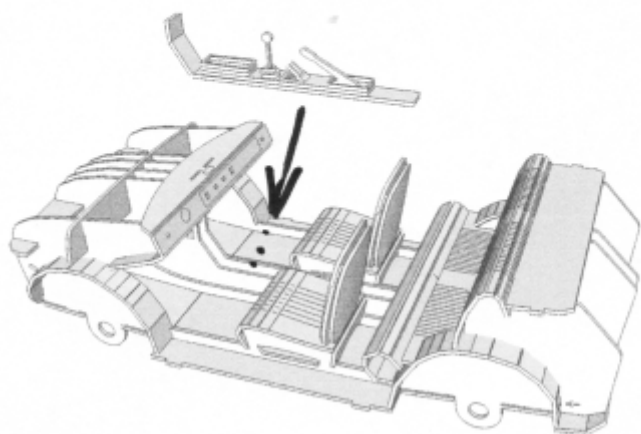

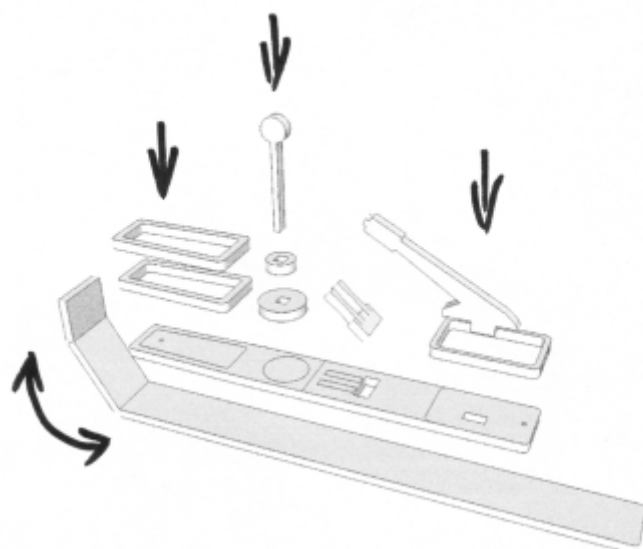

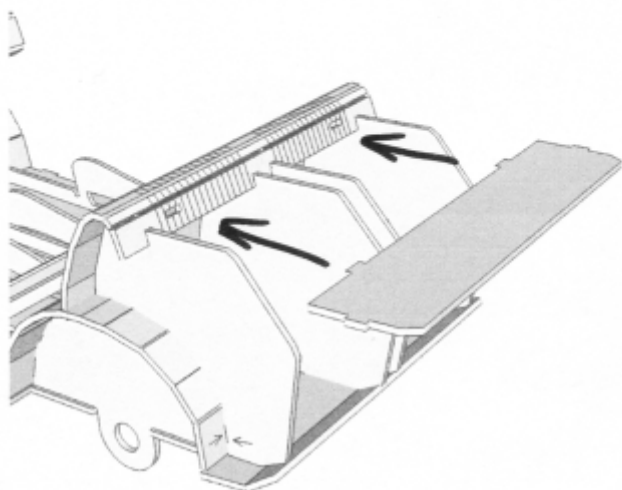

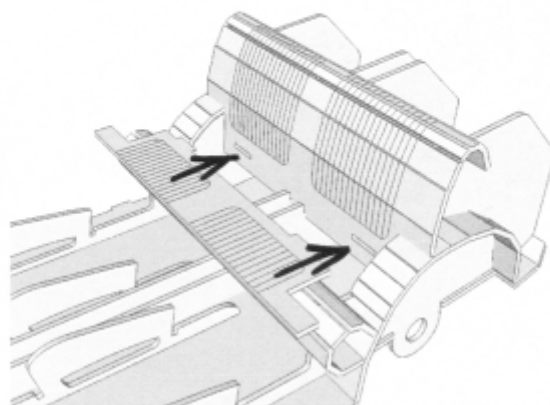

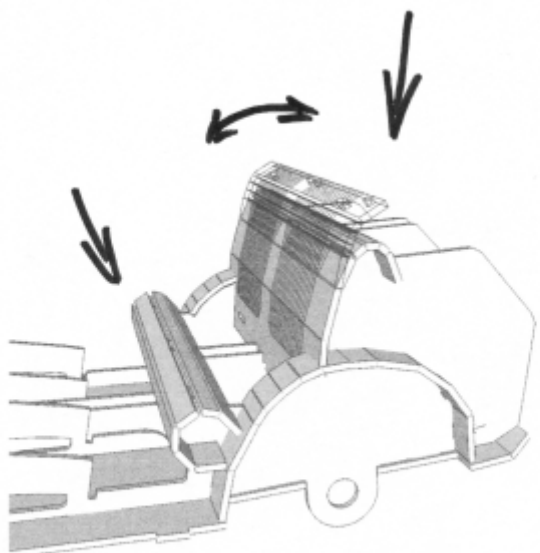

Finalny efekt oraz jakość wykonania modelu zależy od dokładności w montażu

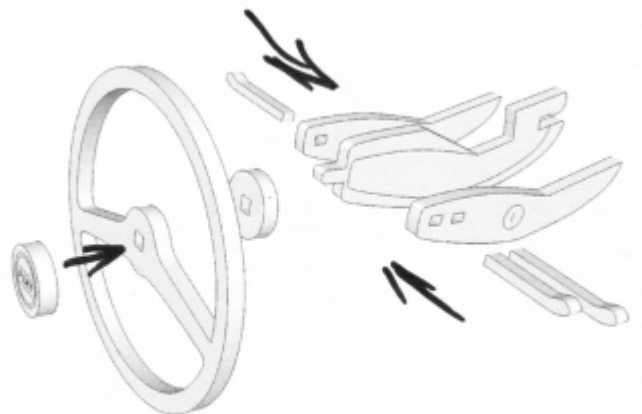

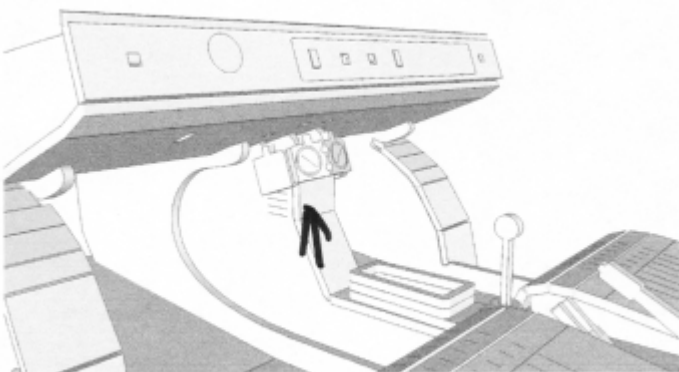

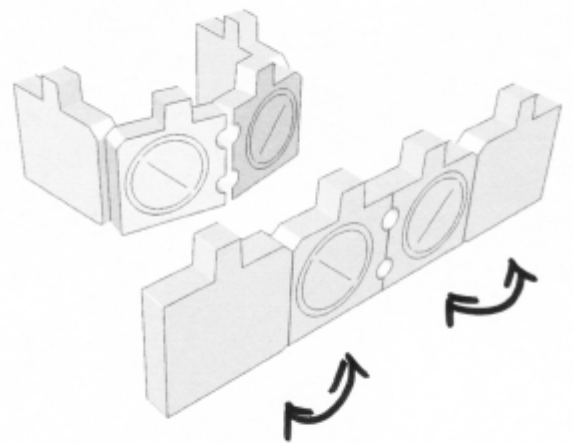

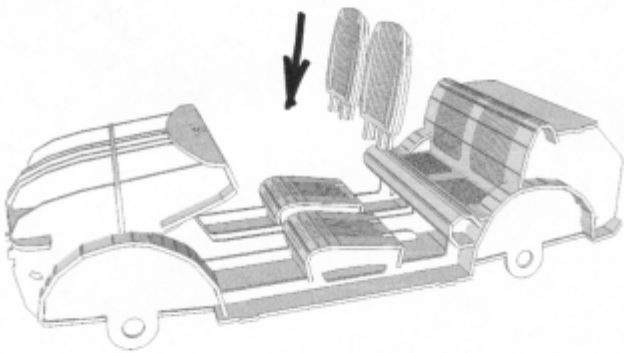

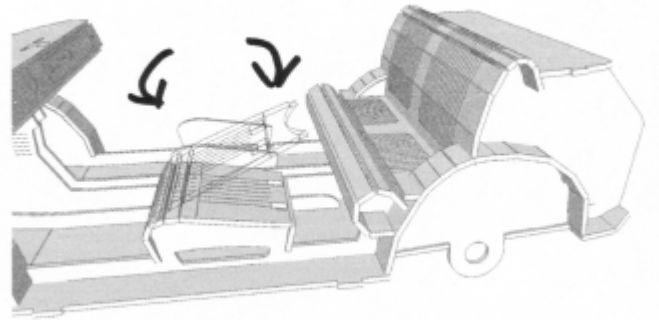

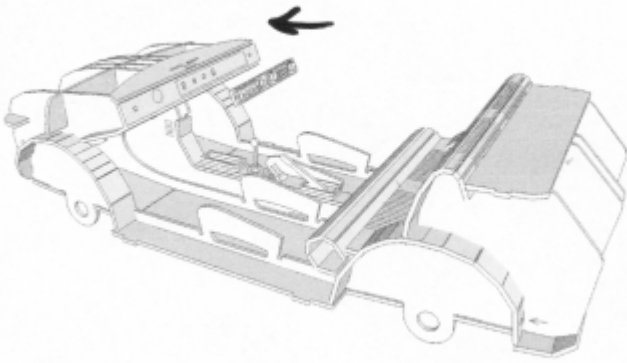

Miłej zabawy - Zespół CraftyModels

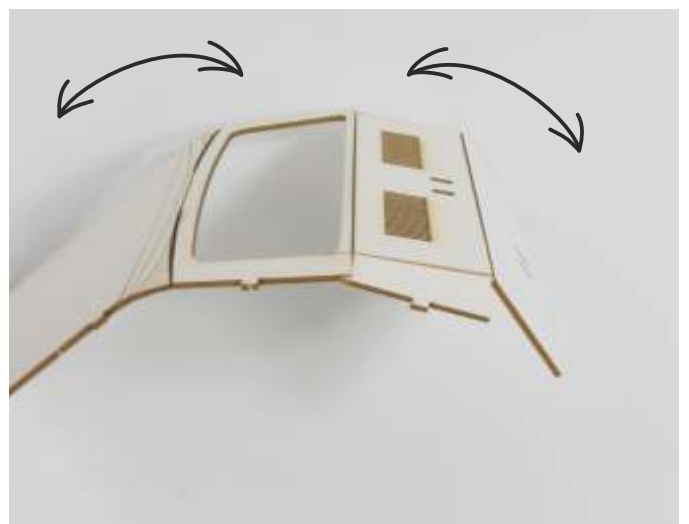

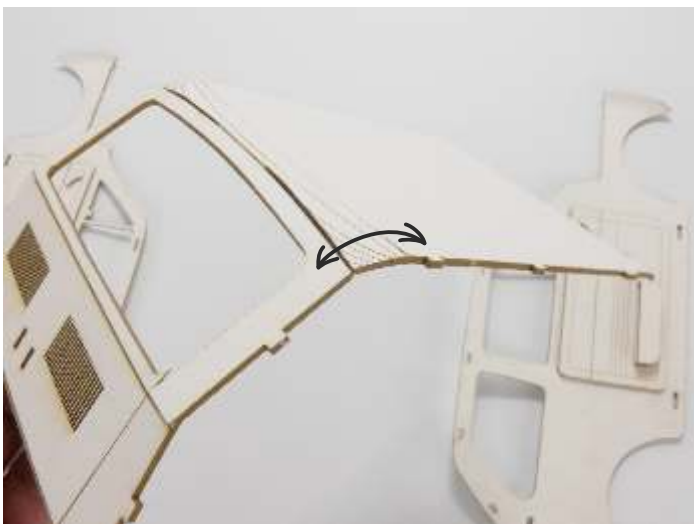

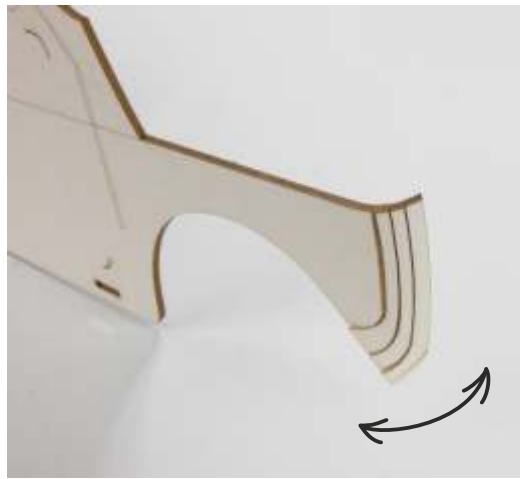

Wszystkie elementy mocujemy przy pomocy kleju
zalecany klej „Magic” z aplikatorem
lub inny klej do papieru na bazie wody

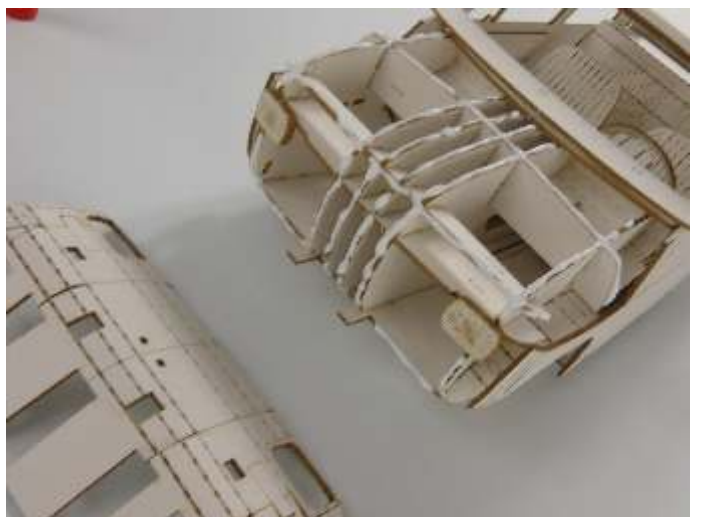

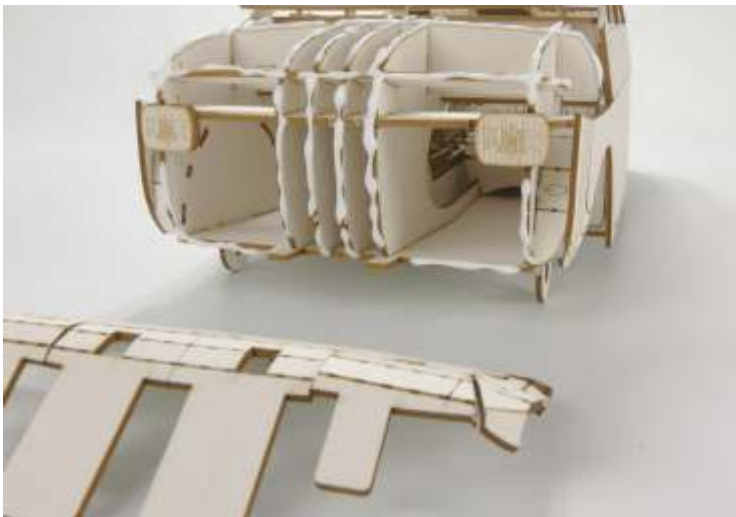

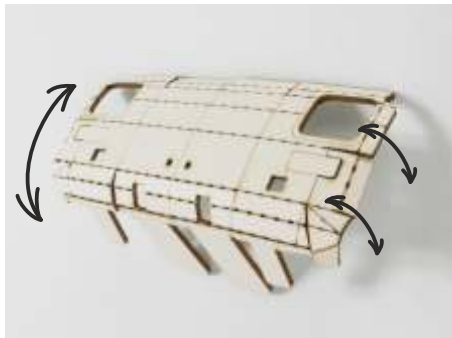

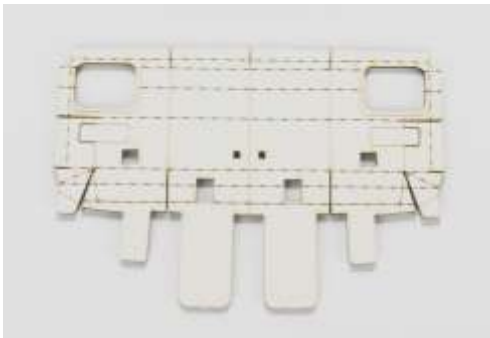

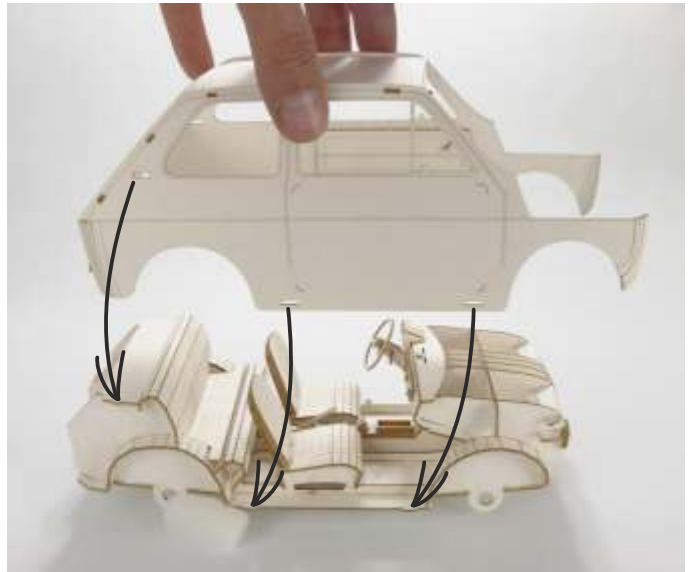

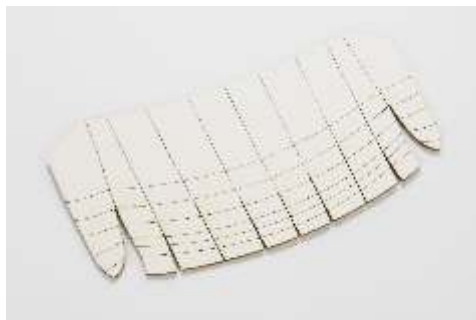

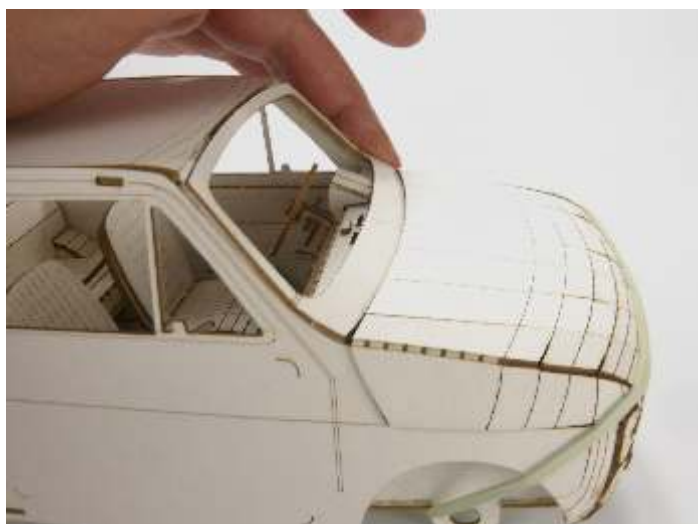

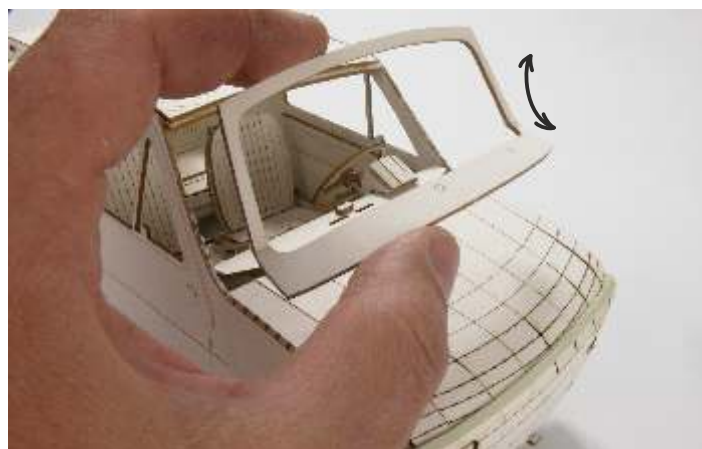

wszystkie elementy mocujemy przy pomocy kleju

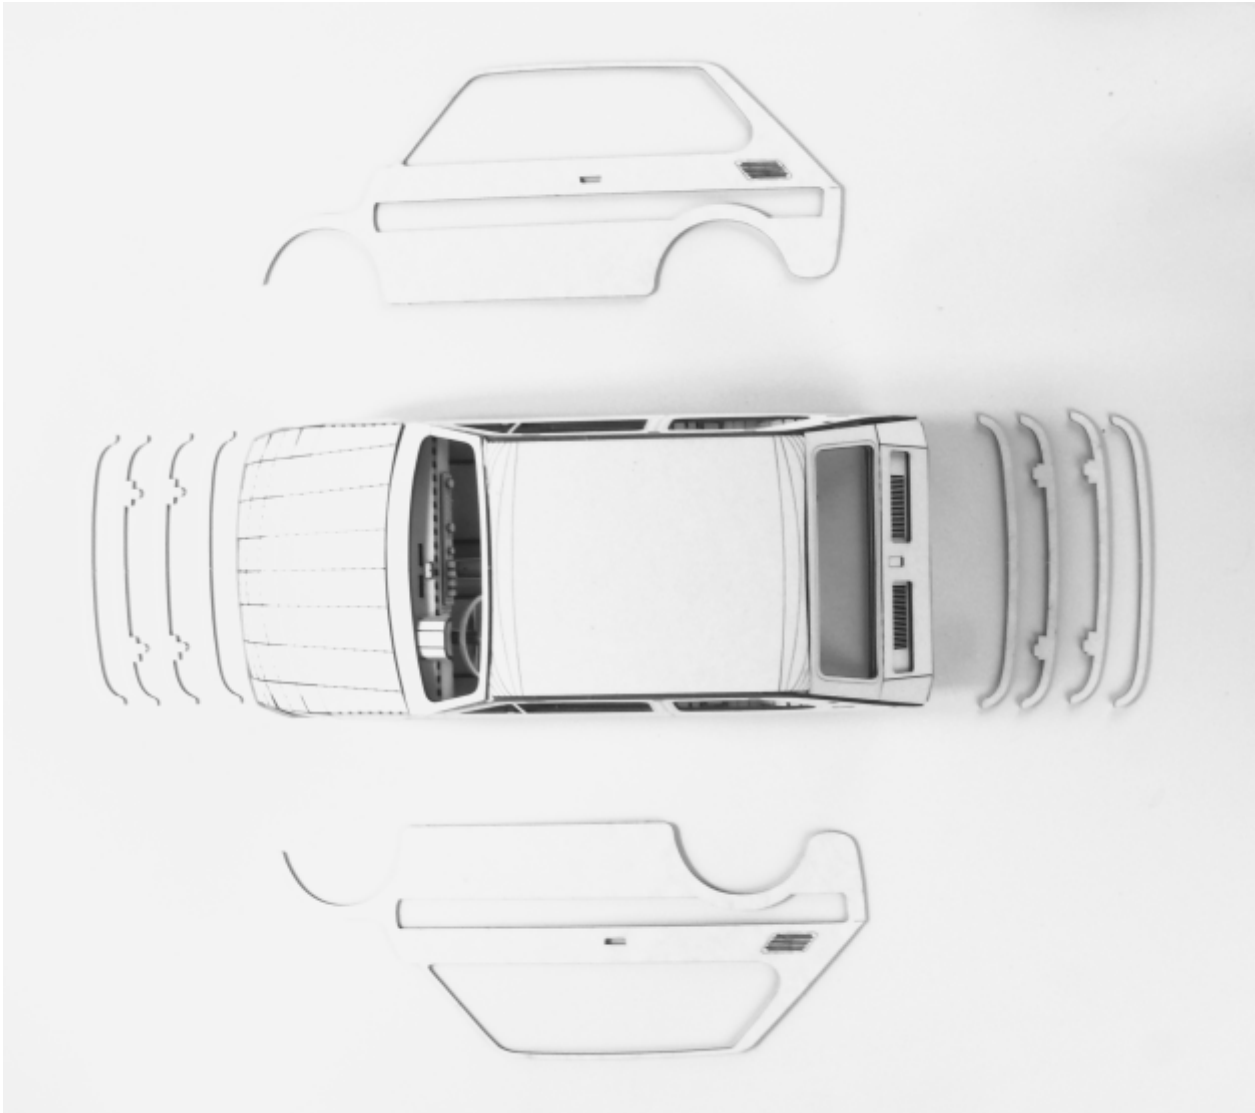

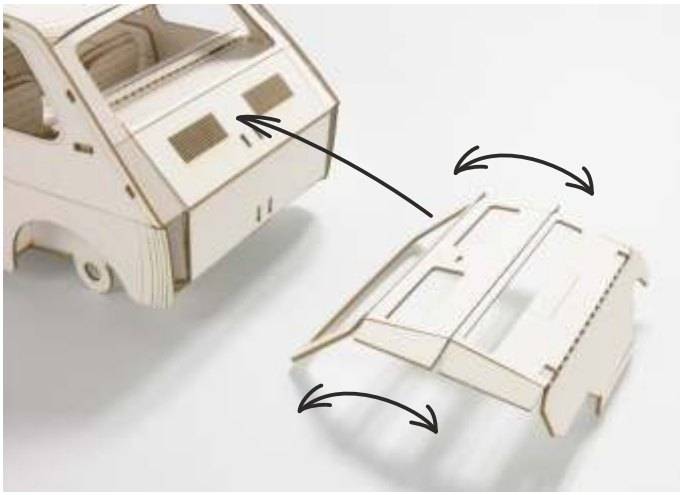

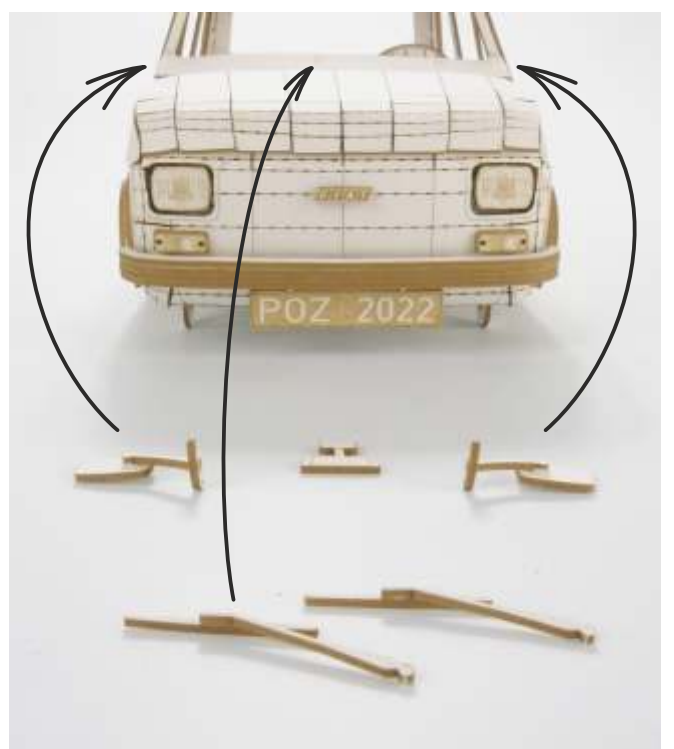

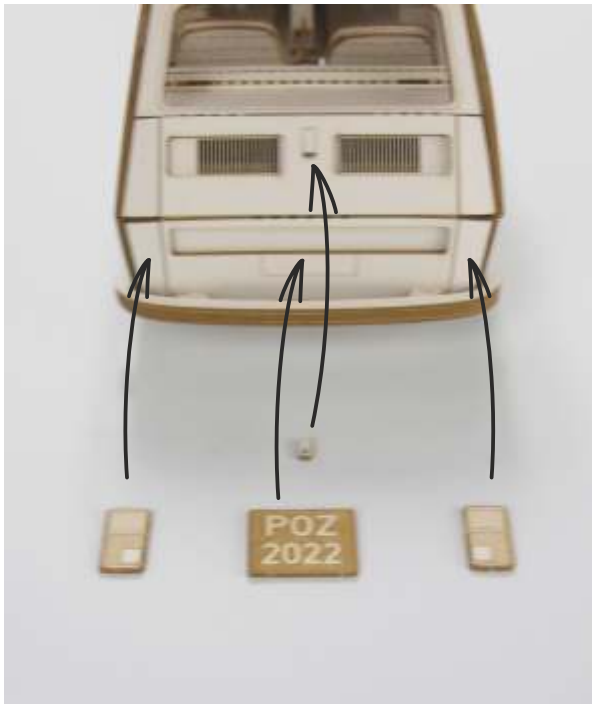

Odpowiedni kształt formujemy ręcznie na sucho

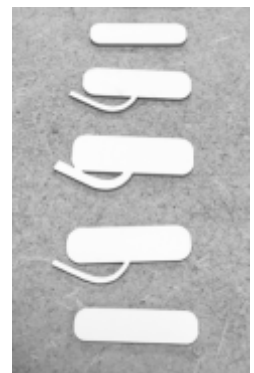

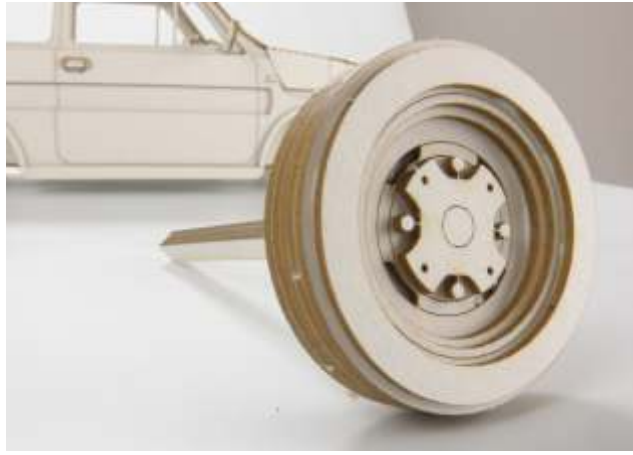

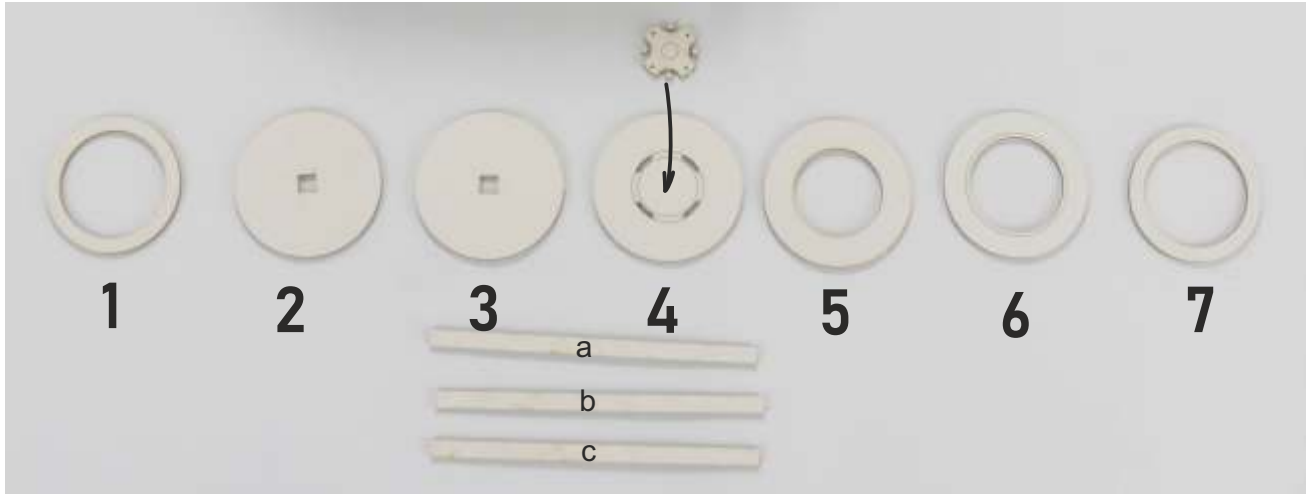

Do czasu wyschnięcia kleju przy trudnych kształtach np. maska lub przód auta, można użyć gumki recepturki. Czas schnięcia kleju na styku tektury to 10min. Po tym czasie można przejść do kolejnego etapu
