

ECPS

WHAT WE  
DO

We here at the ECPS group specialize in the automotive industry and deal with exotic cars including but not limited to Lamborghini, Ferrari, Maserati, Aston Martin, Bentley, and McLaren. Our expertise lies in the repair and modification of said vehicles. What sets us apart from the competition is our manufacturing of high-end handmade carbon fiber parts, and our crew's attention to detail regarding all aspects of repair. Our carbon kits and mechanical work will turn your car into something more than just factory new. We also boast one of the 3 largest inventories of spare parts in Europe, ranging from brand new to second hand.

CARBON

We offer a few types of carbon:

Carbon fiber is a luxurious product in the automotive industry, giving any car a more characteristic and unique feel.

### Some facts about our production:

- We manufacture high quality carbon parts, for all supercars.
- All our products are handmade with outstanding precision and accuracy.
- We use the best carbon materials available on the market.
- The components we use for production are of European origin and are subject to quality control and approval.
- The expertise of our employees will guarantee an end product of excellent quality.
- Depending on the clients needs we are able to organise production on a larger scale.
- The waiting time depends on the complexity in terms of the construction and size of the product.
- We offer a wide selection of carbon fibers, including twill, forged, plein, and v-joining. With a finish of either matt, gloss, or various other colour options.
