

## CO DETECTION

Carbon monoxide detection systems CO are professional, certified carbon monoxide detectors adapted to the conditions on yachts and work units.

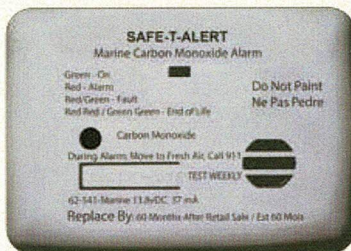

CO detectors are easy to install and use. They have certificates required on recreational boats used in the United States

### Features of sensors from the 62-54 series:

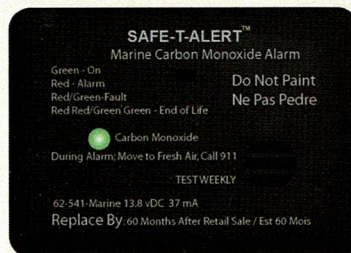

- NMMA Listed
- Resistance to vibration and increased humidity
- TEST mode
- Easy installation
- Available in white and black
- Available in flush and wall mount versions

**Europe:** in accordance with ISO 9094 regulations - it is recommended to install CO detectors in all living quarters and galleys on recreational and commercial vessels

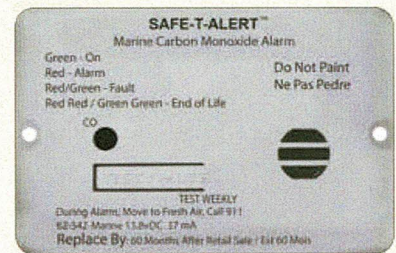

**USA/Canada:** in accordance with ABYC A-24 regulations - CO detectors must be used in all living quarters and galleys on recreational and commercial vessels
