

## WHAT YOU SHOULD KNOW PRIMABIOTIC

- Collagen is the most-important protein in the body
- Its levels in the body start to drop after approximately 25 years of age
- Stress, poor diet and increased physical activity can disrupt collagen production
- Collagen takes part in the life functions of almost all systems, organs and tissues
- Collagen fibres are the fundamental building block for the skin, tendons, bones, joints, and the cornea of the eye

### Primabiotic Collagen

recommended for anyone who wants to stay looking young and full of vitality. It's a product for women, men and seniors.

The first effects of supplementation can be seen after just one month, and the best ones after three months of regular use.
