DENKAMILK ROYAL 30

EXTREMELY APPETISING AND ALL-
ROUND COST EFFECTIVE PERFORMANCE

Denkamilk products are characterised by their high quality, high solubility, good growth rate results and positive effect on calf health. Denkamilk Royal 30 was developed to provide all-round optimal growth rates in young calves.

Denkamilk Royal distinguishes itself in the top segment with its high-quality composition. Royal 30 is based on inclusion of skimmed milk powder, top quality vegetable proteins and contains a balanced package of essential oils, pre- and probiotics, and resin acids (Progres®) to support intestinal safety. Royal 30 has a constant, high specification raw material composition, containing only refined vegetable oils, based on finest emulsification and a correct balance of omega 3- and 6 fatty acids. The product is easily soluble, creamy and, thanks to the attractive taste highly suitable for a variety of calf breeds. This makes Denkamilk Royal 30 a widely appreciated premium choice for livestock farmers aiming for optimum initial development of calves.
