

**Please note**

**Do not bend the LED screen**

**Keep it dry**

**Avoid scratching the backpack with sharp objects**

**Do not expose the backpack to corrosive substances**

## **Instruction Manual**

**Please use a power bank from a reputable manufacturer**

**Please keep the QR code inside the backpack**

## **Product Description**

1. **After connecting via Bluetooth, you can switch screen content in real-time through the app, supporting DIY customization.**

2. **The screen requires a 5V/2A power supply. Locate the USB power port inside the bag, plug in the power bank, and the screen will turn on.**

## **Install the "Eye of Love" Application**

1. **Download the "Loye App" application and install it on your phone**

2. **After successful installation, authorization is required for first-time use**

## **Connect Bluetooth**

**The APP must connect via Bluetooth to operate the backpack.**

**Click the BT icon to enter the Bluetooth connection page**

**Two connection methods:**

### **Method 1: Scan to Connect**

**Scan the QR code inside the backpack to bind**

### **Method 2: List Connection**

**Simply click your BT device number to connect**
