

BALL PIT INSTALLATION GUIDE

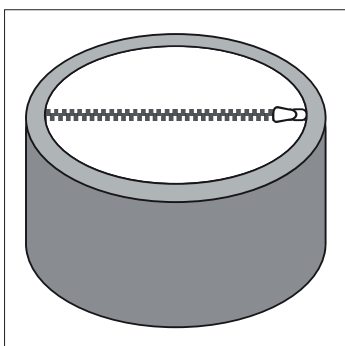

ATTENTION

The Ball Pit cover arrives attached to the product.

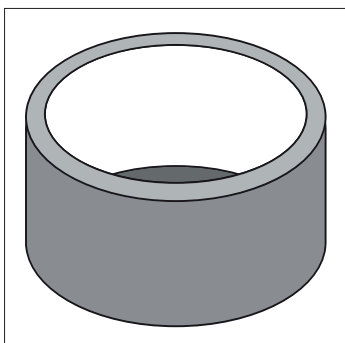

1

Unzip the middle zipper located on the bottom of the product and insert the bottom foam inside.

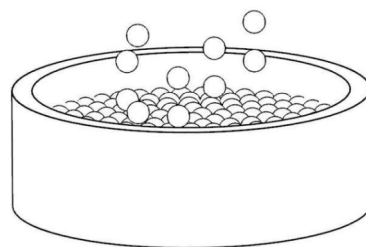

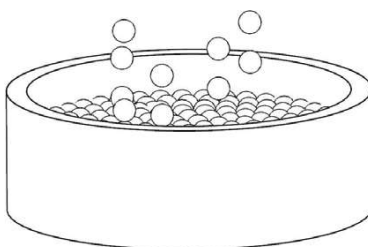

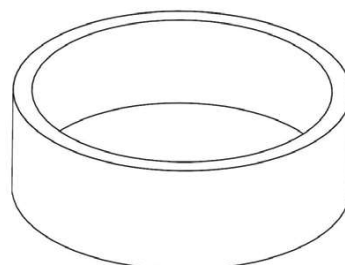

2

Zip up the middle zipper to close. Check the position of the bottom foam with the gray cover to ensure the foam is placed properly. Turn the Ball Pit over.

3

Place the Ball Pit properly on the floor. Installation is complete.

ATTENTION: This product is vacuum-packed and will expand to its final, circular shape in approximately 48 hours. If the shape has not fully expanded, use the cold to moderate air setting on a hair dryer to easily restore it. You can also stuff the empty Ball Pit with pillows and blankets to help with shape recovery.
