

LogiLink®

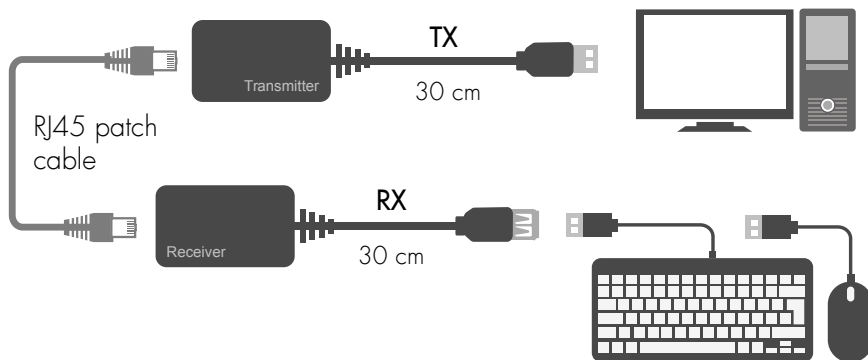

USB Line Extender

via Cat.5/5e/6 up to 60 m

Art. No.: UA0021D

This LogiLink USB Line Extender consists of a transmitter and receiver unit separately. The transmitter connects to the local USB 1.1 or 2.0 ports on your PC and the receiver unit connects to the USB device. Use the LogiLink USB Line Extender to overcome the USB distance restriction and expand device and PC locations and better organize productive office arrangements. It can help extend a USB keyboard and mouse during presentations and improve other USB applications without signal loss or interference.

It's lightweight and portable with no external power supply or drivers required, making it ideal for use almost anywhere. Plug and Play capability and Windows and Mac OS compatibility make installation easy and quick.

- » Extends the distance of keyboard/mouse and other USB devices from an USB-enabled computer
- » Extension over RJ45 Patch cable up to 60 m (cable not included)
- » Embedded transceivers enhance signal and prevent signal loss
- » USB Bus powered, requires no external power supply
- » Supports Windows and Mac OS
