Transforming the audiovisual experience

Formovie S5 benefits from acoustic design and tuning by Denon's audio experts. It boasts dual 5W high-fidelity speakers, a generous 130cc sound chamber, and impressive low-frequency performance down to 80Hz, outperforming its counterparts in the same category.

23 dB soft tone operation

The noise of movie viewing and office mode is as low as 23 dB, Like a baby silent breathing sound. No noise interference, Build a sound field ring that is quiet enough. I hear pure good voice

Intelligent Picture Correction

Omnidirectional automatic correction

The S5 supports horizontal $\pm 45^\circ$ and vertical $\pm 45^\circ$ offset correction, so customers no longer need to be scrupulous but casually place the projector to acquire a square picture.
