Dryland grass 2kg Drought tolerant green oasis

This grass lawn **mixture** has been specially developed for establishing lawns in areas **subject to intense sunlight and periodic lack of water**.

It performs perfectly on **dry, barren and poorly drained soils**, creating a **dense, green turf with a deep root system** that requires minimal maintenance.

Advantages:

- ☐ **Drought toler**ant - the lawn remains green even in prolonged lack of rain.
- ☐ **Minimal maintenance requirements** - does not require frequent watering or mowing.
- ☐ **Dense turf** - creates a compact and aesthetically pleasing surface.
- ☐ **Durable to withstand heavy use** - ideal for gardens, allotments and recreational areas.

Parameters:

- ☐ **Brand:** Biopon
- ☐ **Packing weight:** 2 kg
- ☐ **Packaging:** cardboard box with handle
- ☐ **Productivity:** 88 m²
- ☐ **Type:** Dryland grass mix.

Application:

- ☐ **Wysiew:** Po wysianiu nasion należy dbać o stałą wilgotność podłoża do momentu pełnego rozkrzewienia trawy.
- ☐ **Pierwsze koszenie:** Gdy trawa osiągnie wysokość 8-10 cm.
- ☐ **Kolejne koszenia:** Regularnie do wysokości 4 cm, ale nie krócej niż 2,5 cm.
- ☐ **Pielegnacja:** Warto stosować nawóz od wiosny do jesieni (najlepiej po koszeniu).
- ☐ **Wydajność:** 2 kg mieszanki wystarcza na 88 m² trawnika.

- ☐ **So wing:** After sowing the seeds, keep the ground moist until the grass is fully established.
- ☐ **First mowing:** When the grass has reached a height of 8-10 cm.
- ☐ **S ubsequent mowing:** Regularly up to a height of 4 cm, but not less than 2.5 cm.
- ☐ **Maintenance:** It is advisable to apply fertiliser from spring to autumn (preferably after mowing).
- ☐ **Yield:** 2 kg of mix is sufficient for 88 m² lawn.
