PUPPY KITTY
Quick Guide

EN

01

2.4G ✓

02

5G ✗

Connect to your 2.4GHz Wi-Fi network

! ATTENTION!
The 2.4GHz Wi-Fi network password must not contain special characters ("!", "@", "\$", "*", "&", "%", "^" etc.), otherwise the Smart Life App will not be able to connect to the pet feeder during the setup process.

03

Turn on the Wi-Fi, Bluetooth and location of your phone.

04

Plug in the Pet Feeder and wait for the blue light to start flashing rapidly.

05

Scan the QR code and download "Smart Life" APP

06

During initial setup, make sure that the router, device, and phone are within 10 meters of each other to avoid errors.

07

Log in to the Smart Life APP and click "Add Device"

08

After a few seconds, the pet feeder automatically pops up, if not, restart the setup process from step 1.

09

Choose Wi-Fi and enter password

10

Wait until the setup is complete. If it fails, restart the setup process from the first step.

11

Added successfully Click "Done".

QA

Q: If the device is disconnected from the wifi, will the food continue to be released according to the previous schedule?
A: The original feeding schedule will continue to work after WIFI is disconnected, you just can't edit the feeding schedule.

Q: Can I use the app to control both feeders?
A: One phone can control multiple feeders at the same time; one feeder can only be controlled by one phone at the same time; device sharing is supported, so multiple people can control one feeder at the same time.

Q: Can I feed with the APP only when I have WIFI?
A: Only 2.4G network is supported when pairing the phone with the feeder. After successful connection, the phone supports the use of 4G/5G network to make feeding plans.

Q: How can I disable voice recording?
A: Record a blank voice to overwrite the previous recording to achieve the effect of disabling the recording.

Q: When the device is unplugged, does everything reset?
A: The feeding schedule is not reset when the device is disconnected.
