

# HONDA ACCORD INSTRUCTION

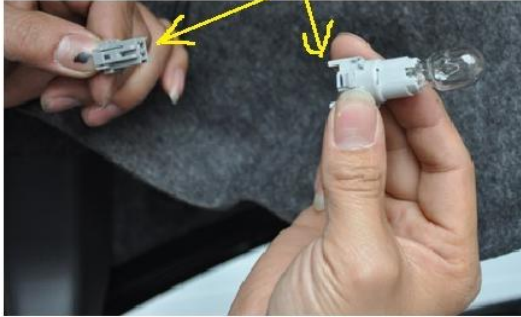

Please preview this whole instruction first then start to act.

**1. this is your original left taillight piece, remove the reversing plug.**

**2. this is "black&blue" wire, connect it with left picture's reversing plug.**

**3. connect the plug and the wire**

**4. install this wire on our LEFT side taillight**

1/2/3/4. connect extension "black&blue" wire with LEFT side taillight of reversing plug. (right side taillight don't need this extension wire.)

this black wire is turning light

**5. this black wire is turning light plug, you need take your original turning socket to connect with it. (see step 6)**

6. this piece's installation is same as pic1, remove it then install it on our own taillights (pls see pic 5). Ok, congrats, it can work now!

**6. this piece's installation is same as step1, remove the socket then install it on our taillights' turning light wire. (see step 5)**

PS: pic 1 & 6's taillight is original one (is your taillight, you need to remove the sockets).

Pls take care of all sockets and wires, don't use too much power pull them ponderously.
