

BestLife  
HOT TUBS

# BestLife - for us time, me time or family time

Relax Your Mind • Recharge Your Life  
Sleep Better • Massage Therapy

# Exceptional Luxury

We know you have many choices and we understand your investment in a spa is one that should not be taken lightly. Whatever your individual reasons are to start enjoying the benefits of living the spa lifestyle, we are committed to exceeding your expectations.

Although many spas may look similar, they are not built the same. Throughout your journey we encourage you to educate yourself, and then compare the design and construction techniques of a BestLife spa.

# Complete Hydrotherapy

BestLife hydromassage therapy offers a personal hotwater healing alternative – with benefits that help with pain relief, stress relief, greater mental awareness, improved well-being and release of toxins.

**MassageMax Jets**

Jets designed for multiple massage styles

**Wrist and Elbow**

Multi-point massage therapy

**Foot**

Reflexology direct to the bottom of each foot

**AirMax Jets\***

Airnetic Technology  
\*HighEnd serie only

**Comfort pillows**

Seating comfort design with BestComfort Pillows

**Complete therapy**

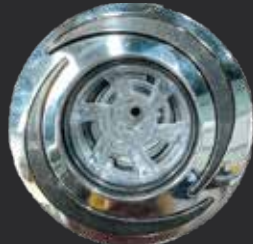

Various types of hydromassage in one hot tub for a complete therapy experience.

## MassageMax<sup>2</sup> Jet Technology

BestLife spas come standard with exclusive groups of personal hydromassage jets, designed to provide a vigorous yet gentle massage. The high flow pressure design eliminates discomfort associated with typical hard pressure jets found in many other hot tubs.

PowerMax  
PowerMax Total  
Massage Jets

LazerMax  
Delivers a straight  
constant massage

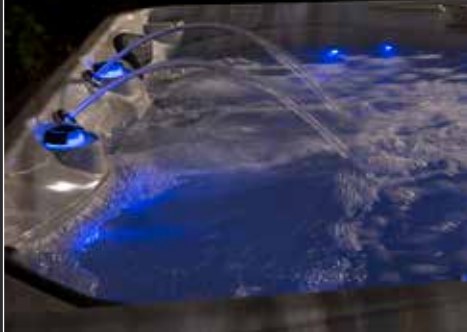

DirectionalMax  
Adjust the direction  
to desired location

# Unique features

## Crystal Springs LED Fountains

A true laminar stream of water rises above the water surface providing a soothing visual and sound effect.

## PureLife 100% ISO-Water Filtration

A sealed debris-trapping vacuum filtration system for superior water quality and ease of maintenance

## CleanSweep

Downward sweeper action helps lifting small elements from the bottom towards the spa filtration system.

## Forceflow Skimmer

Debris on the water surface is directed through a skimmer door, trapping it inside the skimmer basket.

## AquaNova Water Management System\*

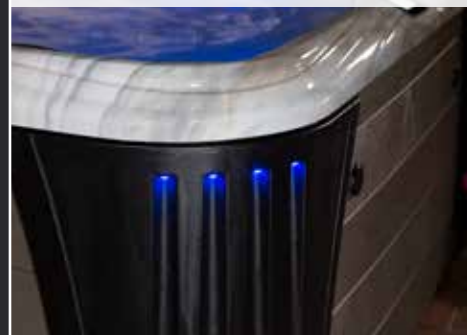

BestLife Spas are equipped with the most efficient water management system in the market.

## Infuse Aromatherapy

With a push on the button you complete your spa experience with your favourite spa fragrance.

## LED Safety, Style and Ambiance

Corner LED illumination adds visibility and style around your tub

## Convenience - Serving Tray

A topside serving tray for keeping your towel, smart device and beverages within reach.

## AquaCoustic Audio System\*

Surround yourself with your favourite music, streamed directly from your smart device. Simply connect and enjoy.

\* Standard on selected models, optional on other models. Please see model specifications.

# Harness the power of airnetic technology

The Air-X seat is a completely new therapy experience available from BestLife Spas. It is a precision soft tissue massage that provides essential therapy for sensitive areas. Perfect for neck and shoulders, wrists, feet, ankles and paraspinal.

Air-X infuses the soft feel of air and water with kinetic power derived from jet engine technology. It is an air mixing technology without the need for those noisy air blowers, delivering an efficient and powerful performance. Spa jets can offer power and precision, but Air-X is something completely different. Utilizing Airnetic engineering, Air-X mixes the water output of a jet with 80% air, for a jet stream that is both soft and powerful. By combining three flow patterns with stimulating reflexology, sore muscles and tired joints are soothed and rejuvenated.

# Weathershield Cover & Cover Lifter

Weather and fade resistant lockable energy saving cover with locking safety straps.  
Plus, convenient cover lifter for opening, replacing and handling your cover.

- ✓ 100% polyester, polyurethane backed to stop absorption of water
- ✓ Inhibits the growth of mildew and mold
- ✓ It is not only lighter and stronger than standard Vinyl, it also has a higher consumer appeal
- ✓ Using recyclable materials makes this cover environmentally superior

# AquaNova\* UV + Ozone Spa Sanitizer

## Technology

With the unique combination of ozone (O<sub>3</sub>) and UV-C technologies, AquaNova is the ultimate solution for water sanitation in one compact and simple system. Providing the water quality and spa care one could expect from chlorine/salt water systems, AquaNova has more sanitizing power, better reliability, and less hassle, all while significantly reducing residual chlorine consumption to deliver the most advanced sanitation potential available.

## Innovation

The Patent Pending built-in venturi injector system provides superior water – ozone – uv mixing for even greater water quality. It will also save you space, time and money in production costs. Simply plumb one tube in and one tube out. No separate injector plumbing required. Built-in fault detection and lamp life timer software takes the guesswork out and ensures the system is operating at its optimum.

## How it works

The ozone is produced first, and then exposed to UV light. Once exposed to the UV light, the O<sub>3</sub> is converted to hydrogen peroxide, which is further converted to hydroxyl radicals. As an oxidizer, hydroxyl radicals have been found to be more potent than hydrogen peroxide or ozone and much more powerful than chlorine. This is true synergy in that the whole is greater than the sum of its parts. Scientists conducted an experiment to determine if using UV and ozone together results in better bacterial reduction than UV or ozone alone. Scientists have found that the amount of UV & ozone needed to complete this task was far less when used together, than when used alone.

\* Standard on selected models, optional on other models. Please see model specifications.

# Energy Efficient, Durable and Reliable - Built To Last

Every BestLife spa starts with a solid foundation. Our polyethylene ABS Capped Bottom Tray seals out critters and moisture while sealing in the heat.

Integrated into the ABS Capped Bottom Tray is our galvanized steel frame. Engineered to provide the strength and stability required to support over 3200 kg. Unlike wood frames, our galvanized steel structure is built to last. Not only is it 10 times stronger than wood, it will not crack, warp or rot and unlike wood it will not sustain termites or rodents.

The plastic corners ensure that every frame is assembled easily, quickly and always to factory specification.

The third component of our system is the polysteel cabinet system. The polysteel system provides superior insulating properties and unprecedented sound blocking characteristics. In addition to being completely resistant to rotting, cracking and peeling, our maintenance free cabinet has the look and feel of real wood.

# Green Guard Roxul Insulation

Every BestLife Spa is insulated with our proprietary Green Guard Roxul Insulation.

This method of insulation captures and recirculates the spa's own heat energy throughout the interior cabinet, reducing the demand on the heater – saving you money.

Other benefits of our proprietary insulation:

- ✓ Won't absorb or retain moisture, like traditional spray foam insulation does, preventing mold and mildew build-up.
- ✓ Superior noise absorption makes Sunrise hot tubs some of the quietest spas on the market.
- ✓ Is inorganic and will not provide a food source necessary for bacteria or small animals to consume.
- ✓ The R<sub>c</sub>-value of this insulation is 8, the same level required when making homes climate neutral.

### State of art spa controls

The BestLife Spas advanced Touch Screen control panels are easy to read and allow you, with the tap of your finger, to change the temperature, adjust lighting or control your massage. Unlike your smart devices this control works even when wet.

### Worldwide Access\*

The Control My Spa app gives you access to your spa wherever you are, as long as you're connected to the Internet.

### Powerful Pumps

BestLife uses powerful 2,2kW hydrotherapy pumps for the best massage experience.

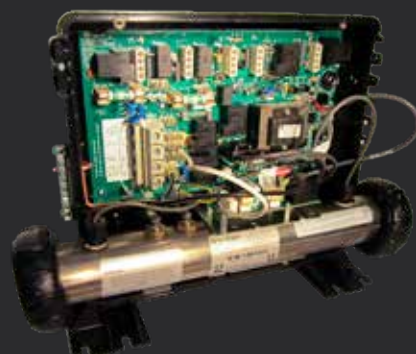

## No-Leak Colour Plumbing

The plumbing harnesses in BestLife hot tubs are designed with optimal colour-coded hose arrangements that keep the spa cavity uncluttered. Our Triple-Seal plumbing ensures each jet fitting will not leak and our straight-line plumbing is engineered for better water flow.

## Intelligent Control by Balboa

An advanced, state of the art spa controller provides the ultimate in ease of use, safety and reliability for every spa user. Equipped with a corrosion resistant Titanium Heater.

The BestLife Acrylic body colours are made with a deep-luster authentic acrylic material that maintains its colour and appearance through years of continued use.

Each side cabinet panel is designed with a wood textured HDPE that holds its colour and is easy to clean.

All colour-fast Durafab insulating covers are climate resistant and come with safety straps and locks.

*Colours and specifications may vary or appear differently than actual product and are subject to change without notice.*
