USAGE INSTRUCTIONS

WARNING:

Please retain instructions for future needs.

Flammable: This product will ignite and burn if brought into contact with an open flame.

Do not scratch the surface or interior with sharp objects such as knives.

SAFETY TIPS:

Backpack:

Shoulder straps that are too long will cause the backpack to fall back, and the shoulders will need more force to keep the backpack stable, which will compress the trapezius muscle. Without a chest strap or belt to share the weight, you can increase the load on your back and cervical muscles. Therefore, the shoulder straps should be adjusted, so that the shoulder straps to the backpack close to the back. Then buckle the waist belt and chest strap, as this can reduce the burden on the back and alleviate spinal muscle pain.

Single-shoulder Bag:

When all the weight of the bag is concentrated on the shoulder straps, they have to bear the full burden and may slip, causing the shoulder joint and spine to be in an abnormal position. Over time, this can lead to conditions such as high and low shoulders, scoliosis, and hunchback.

ATTENTION:

Alternating the side or shoulder you carry your backpack on every 10 minutes can help prevent strain on the spine and neck. If you experience persistent shoulder and back pain, it's important to seek medical assistance promptly.

USAGE INSTRUCTIONS

AVERTISSEMENT:

Veillez conserver les instructions pour de futures besoins.

Inflammable : Ce produit s'enflammera et brûlera s'il est amené en contact avec une flamme nue.

Ne rayez pas la surface ou l'intérieur avec des objets pointus tels que des couteaux.

CONSEILS DE SÉCURITÉ :

Sac à dos :

bretelles trop longues feront retomber le sac à dos et les épaules il faudra plus de force pour maintenir le sac à dos stable, ce qui comprimera le trapèze muscle. Sans sangle pectorale ou ceinture pour partager le poids, vous pouvez augmenter la charge sur votre dos et vos muscles cervicaux. Par conséquent, les bandoulières doivent être ajustées afin que la bandoulière est fixée au sac à dos près du dos . Bouclez ensuite la ceinture et la sangle pectorale, car cela peut réduire la charge sur le dos et soulager les douleurs musculaires de la colonne vertébrale.

Sac à bandoulière simple :

Lorsque tout le poids du sac est concentré sur les bretelles, celles-ci doivent supporter tout le poids et peuvent glisser, provoquant une position anormale de l'articulation de l'épaule et de la colonne vertébrale. Au fil du temps, cela peut entraîner des affections telles que des épaules hautes et basses, une scoliose et un bossu.

ATTENTION:

Alterner le côté ou l'épaule sur lequel vous portez votre sac à dos toutes les 10 minutes peut aider à éviter les tensions sur la colonne vertébrale et le cou. Si vous ressentez des douleurs persistantes aux épaules et au dos, il est important de consulter rapidement un médecin.

AVVERTIMENTO:

Si prega di conservare le istruzioni per il futuro esigenze.

Infiammabile: questo prodotto si accenderà e brucerà se portato con sé a contatto con una fiamma libera.

Non graffiare la superficie o l'interno con oggetti appuntiti come coltelli.

CONSIGLI PER LA SICUREZZA:

Zaino :

Gli spallacci troppo lunghi faranno cadere indietro lo zaino e le spalle avrà bisogno di più forza per mantenere stabile lo zaino, cosa che comprimerà il trapezio muscolo. Senza una fascia toracica o una cintura per condividere il peso, è possibile aumentare il carico i muscoli della schiena e della cervicale. Pertanto, la tracolla deve essere regolata in modo tale la tracolla è attaccata allo zaino vicino alla schiena . Quindi allacciare la cintura in vita e quella toracica, in quanto ciò può ridurre il carico sulla schiena e alleviare il dolore ai muscoli spinali.

B arsa monospalla :

Quando tutto il peso della borsa è concentrato sugli spallacci, questi devono sostenere l'intero carico e potrebbero scivolare, causando una posizione anomala dell'articolazione della spalla e della colonna vertebrale. Nel tempo, ciò può portare a condizioni come spalle alte e basse, scoliosi e gobba.

ATTENZIONE:

Alternare il lato o la spalla su cui porti lo zaino ogni 10 minuti può aiutare a prevenire tensioni sulla colonna vertebrale e sul collo. Se avverti dolore persistente alla spalla e alla schiena, è importante cercare assistenza medica tempestivamente.

USAGE INSTRUCTIONS

VARNING:

Spara instruktionerna för framtiden behov.

Brandfarligt: Denna produkt kommer att antändas och brinna om den tas med i kontakt med öppen låga.

Repa inte ytan eller interiören med vassa föremål som knivar.

SÄKERHETSTIPS:

Ryggsäck :

Axelband som är för långa gör att ryggsäcken faller tillbaka och axlarna kommer att behöva mer kraft för att hålla ryggsäcken stabil, vilket kommer att komprimera trapezius muskel. Utan bröstmrem eller bälte för att dela vikten kan du öka belastningen på din rygg och livmoderhalsmuskler. Därför bör axelremmen s justeras, så att axelremmen s till ryggsäcken nära ryggen . Spänn sedan midjebältet och bröstmremmen, eftersom detta kan minska belastningen på ryggen och lindra smärta i ryggraden.

S ingel-axel B ag :

När hela väskans vikt är koncentrerad på axelremmarna måste de bära hela bördan och kan glida, vilket gör att axelleden och ryggraden hamnar i ett onormalt läge. Med tiden kan detta leda till tillstånd som höga och låga axlar, skolios och puckelrygg.

UPPMÄRKSAMHET:

Att alternera sidan eller axeln du bär din ryggsäck på var 10:e minut kan hjälpa till att förhindra belastning på ryggraden och nacken. Om du upplever ihållande axel- och ryggsmärtor är det viktigt att söka medicinsk hjälp omgående.
