LOVE AT FIRST BITE

🍊 When the first digital arcade games were introduced in Japan in the 1970s, they took the country by storm. Soon after, the rest of the world caught wind and players flocked to dimly lit game centres everywhere, enticed by flickering pixels, mechanical music and the alluring high score. Shooting games were the most popular – and often only – choices and catered mainly to a male audience. Japanese Game Designer Toru Iwatani posed that women might also enjoy playing games, if the environments were more inviting and the gameplay a little friendlier. After exploring alternative game themes like fashion and fortune telling, Mr. Iwatani chose the ultimate socially inclusive theme: food.

THE INSPIRATION

🍕 One day, as he was working on game ideas, he grabbed a slice of pizza. In the remaining pie, he saw the shape of a simple iconic figure with its mouth open. The idea for PAC-MAN was born. The game's original name, Puck Man, was inspired by the Japanese phrase "Paku paku taberu" which means gobbling up or devouring food. When the game was launched in the US, the distributor found that PAC-MAN would be a more suitable name for the market.

Iwatani's original Puck Man design sketches on graph paper were used to plot the pixels on a 16x16 pixel grid.

Toru Iwatani

Mr. Iwatani also shared an episode where he referred to the yellow colour of LEGO® bricks when he chose the colour of PAC-MAN. He chose LEGO yellow because he thought his target customers – women and kids – would feel more comfortable with its warmer colour.

A GLOBAL GAMING PHENOMENON

🍓 Mr. Iwatani's theory was proven right beyond his wildest imagination. Soon after the first PAC-MAN arcade game was released in 1980, it grew into an unprecedented global phenomenon. The game instantly appealed to new audiences who might never have considered visiting a gaming arcade. The cute characters and intuitive gameplay won the hearts of every generation. For the first time, women, men, kids, teens and grandparents could share a family-friendly digital gaming experience. With more than 300,000 consoles sold in the first decade, the game grossed \$2.5 billion US by the turn of the century, and it still holds the record as the most popular arcade game to date.

WHAT HAPPENS ON LEVEL 256 STAYS ON LEVEL 256

🍄 Mr. Iwatani and his team of developers never imagined anyone playing beyond 256 levels – in fact, the game wasn't even designed to have an ultimate end goal or victory scene. By the time you reach level 256, there is not enough memory left to generate a full board and your journey through PAC-MAN's maze ends here. (Unless you start over, of course.)

THE PESKY GHOSTS

 PAC-MAN fans are equally invested in the game's supporting characters – the four ghosts. Each has its own unique personality and even move in different ways:

BLINKY

BLINKY is the leader of the ghost pack, nimble and very persistent.

INKY

BLINKY's right-hand ghost is a little shyer than his fellow phantoms.

CLYDE

Quite the explorer, CLYDE constantly wanders into every corner he can find.

PINKY

Don't let PINKY's delicate looks fool you – she is a lethal opponent!

PAC-MAN PERSISTS

 The unpretentious protagonist and playful adversaries have evolved in countless iterations over the decades. Still, the nostalgia of the original arcade game remains unrivalled, and PAC-MAN remains universally relatable, timeless and infinitely adaptable to new technologies.

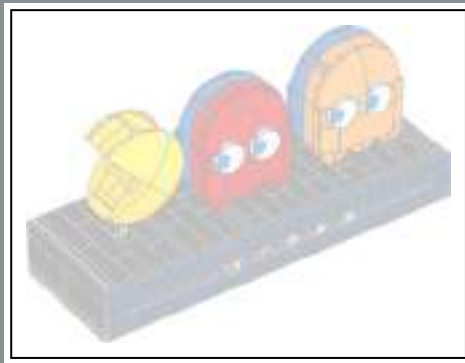

BEAUTY THROUGH SIMPLICITY

🎮 'Each generation of fans has fond memories of their "own" version of PAC-MAN. I clearly remember the classic arcade game halls! Inspired by the original arcade version from 1980, we collaborated with Bandai Namco Entertainment Inc. to create this set. The game mechanics, colour scheme and pixelated graphics are a perfect fit for a LEGO® Icons set. We wanted to capture the nostalgic gaming experience by simulating different functions: Turn on a light by pressing the button by the coin slot, move the joystick and crank the lever on the side to move the characters through the maze. Black elements camouflage the mechanics, and a newly developed link element on the chain allows the icons to turn the sharp corners. We hope it brings back all your favourite memories, too.'
