## Target Stick fine 1000 mm

### Product Description:

**Target Sticks** – wooden rods with a length of 1000 mm. They are made of high-quality dried spruce wood. They fit perfectly into our Target Base, creating a stable structure for your shooting targets.

The 1000 mm length is ideal for shooting with a long gun while sitting or lying down.

### Installation:

Insert the Target Sticks into the Target Base and secure them with the included screws, and an **installation video** is available on the [www.sefr-tactical.com](http://www.sefr-tactical.com).
