

## INSTRUCTIONS

We tried to think through every detail so that you can enjoy the assembly process as well as the result! That's why we decided to put extra effort and emphasis on the preparation process before the assembly.

### IT IS VERY IMPORTANT!

#### How to properly stick the adhesive base onto wood

1. Take the adhesive base and, **WITHOUT PEELING ANYTHING OFF**, try it on the wooden base so that the contour on the wooden base match with the placement of an adhesive base.
2. Remove the **BOTTOM** protective layer of an adhesive base and glue the sticky side onto the wooden base exactly as the contour goes.
3. Start by peeling off a small part of the **TOP** protective layer of an adhesive base and begin laying out the rhinestones according to the symbols indicated on the base.

#### VIDEO INSTRUCTIONS ON HOW TO GLUE THE ADHESIVE BASE ONTO WOODEN BASE

If you find that the set is incomplete or the rhinestones in the set are mixed up, please, take two photos: a photo of the issue you encountered and the article number with the name of the product. Send these photos to: **info@varvikas.com** and we will solve all the problems.
