

► Product Advantages

- 1. Low cost
- 2. Efficient Repair
- 3. Suitable for most car dents
- 4. Protect the original car paint, and the car will not depreciate
- 5. More than 80% of the world's personal sunken repair tools are designed by our company
- 6. Focus on research and development, brand products, trustworthy

T-type puller series (Patented)

The T-type puller is made of high-quality aluminum alloy and has a long service life. Ergonomic, characterised by its suitability for all sizes of depressions, the slide hammer puller is ergonomic, easy to use, efficient and effortless, with the widest range of use.

[Usage]: The T-type puller requires hot melt adhesive and various sizes of rubber gaskets to repair most car dents (also for damage to fridges, motorbike bodies, washing machines and fridges, any metal surface dents, household appliances, etc.).

MPT-T003

Wave type Slider Hammer

Size: 47*11cm
 Weight: 820g
 Material: stainless steel+aluminum
 Craft: electroplating + spraying

MPT-T011

2 in 1 Slider Hammer

Size: 47*12cm
 Weight: 850g
 Material: stainless steel+aluminum
 Craft: electroplating + spraying
 It can be disassembled into a small T-pull for use

MPT-T005

Short size Slider Hammer

Size: 30*8cm
 Weight: 711g
 Material: stainless steel+aluminum
 Craft: electroplating + spraying

T-type puller series (Patented)

MPT-T001

Small red T puller

Size: 10*9.5cm
 Weight: 119g
 Material: stainless steel
 +aluminum
 Craft: electroplating + spraying

MPT-N082

Hammer with hook

Size: 43.5*3cm
 Weight: 1800g
 Material: stainless steel
 +aluminum+rubber
 Craft: electroplating + spraying

MPT-T013

Small black T puller

Size: 9.9*9.2cm
 Weight: 116g
 Material: ABS+Stainless steels
 +Aluminum
 Craft: electroplating + spraying

Usage Scenarios

Dent Lift (Patented)

The new dent lifter design with soft silicone bottom protects the car's original paintwork perfectly while repairing dents. Also adjustable design for dent repair up to 20 cm, adjustable fixing position and distance, characterised by high efficiency and labour saving. Its high quality aluminium alloy also ensures durability.

[Usage]: With a fixed rubber spacer, the dent is lifted and repaired by the simple lever principle.

MPT-Y029

Black plastic dent lifter

Size: 10.9*14.7*13.9cm

Weight: 272g

Material: PC+ABS+rubber

Craft: Injection spray painting

PDR-D

MPT-Y003

Golden dent puller

Size: 22*14.4cm

Weight: 472G

Material: stainless steel+aluminum

Craft: Oxidation sand blasting

MPT-Y004

Black dent puller

Size: 22*14.4cm

Weight: 472G

Material: stainless steel+aluminum+rubber

Craft: Oxidation sand blasting

Usage Scenarios

Pulling Bridge (Patented)

High-quality metal material, durable; unique arch bridge design, can adjust the repair space at will, better repair dents, efficient operation, suitable for various metal surfaces within 30 cm, Special thread treatment, the feature is to ensure that the screws of the bridge bridge will not loosen during use, the force is easy to adjust, easy to observe and control to fine-tune the repair force, and is suitable for various shapes of depressions.

[Usage]: Simply align the middle of the bridge with the recessed position and twist the nut until the recessed part is flush with the surrounding area.

MPT-Y009

Metal silver bridge puller

Size: 15*9cm

Weight: 249g

Material: Aluminum+plastic

Craft: Brushed + Laser

MPT-H020

Metal black bridge puller

Size: 15*9cm

Weight: 249g

Material: Aluminum+plastic

Craft: Brushed + Laser

Usage Scenarios

LED Reflector Board (Patented)

LED stripe line board, through the principle of mirror reflection, the reflective surface will become distorted at the position of the dent, which helps to easily locate the dent and view the center point of the dent, and find some dents that are easy to ignore. USB universal interface, built-in LED light, can ensure normal use even in the weather with insufficient light or at night; equipped with a bracket, which can be fixed on the body, freeing your hands.

[Usage]: Tear off the protective film of the base with the line board, use the reflection principle to find the dent and twist on the car body and paste it, press the valve to fix it, the repair effect is obvious and will not damage the car surface.

MPT-X001

Yellow wire board

Size: 30*21cm
Weight: 472G
Material: Acrylic
Voltage: No electricity required

MPT-N0114

LED lamp bracket

Size: 48*12*12cm
Weight: 100g
Material: Plastic+rubber
Can be used in combination with MPT-X009

MPT-X009

LED reflector board

Size: 36*18cm
Weight: 970g
Material: Acrylic
Voltage: 5V

MPT-X023

LED reflector board

Size: 33.5*15.5cm
Weight: 604g
Material: Acrylic
Voltage: 5V

Usage Scenarios

Pump Wedge

Inflatable airbag with a maximum load rating of 550 pounds (about 249.5 kg), double-sided TPU pouring design, can resist greater pressure, and has higher wear resistance, Rounded corners, hard and durable edges, smooth outside and hard inside, easier to reach small cracks, Detachable/replaceable squeeze pump and precise deflation valve button, only need one-handed adjustment and deflation to use. It is suitable for assisting the use of professional crowbar tools; it is used by general professionals.

[Usage]: (Inflation) Tighten the air valve and press the inflatable ball several times until the air bag is full. (Deflate) Just open the air valve surface.

MPT-A001/ MPT-A018/ MPT-A003

Blue pump wedge

Size: 22.8*14*7.2cm/ 27.2*13.2cm/ 19.3*11.3cm
Weight: 31g/105g/90g
Material: TPU composite cloth
Craft: Heat sealing glue+silk printing

MPT-A004/ MPT-A013

Black pump wedge

Size: 17*16cm/ 27.8*20cm
Weight: 11g/178g
Material: TPU composite cloth
Craft: Heat sealing glue+silk printing

Usage Scenarios

Tap Down Pen (Patented)

The multi-head tap down pen is a starter kit for small and irregular dent damage; the ergonomic pen body is comfortable to hold; the POM (plastic) head design can prevent scratches on the surface of the car paint, and the heads of different shapes act on Different dents.

[Usage]: Select the corresponding tap down pen according to the damage of the dent, tap gently with the tap down hammer, and repeat the operation until the dent is flush.

MPT-H010

9 pcs/set Metal tap down pen

Size: 9.5cm
Weight: 99g
Material: Sai steel + aluminum + plastic
Craft: oxidation

MPT-HK0007

White plastic tap down pen

Size: 14.8*1.6cm
Weight: 105g
Material: Nylon
Craft: integrated molding

MPT-HK0004

Black plastic tap down pen

Size: 14.8*1.6cm
Weight: 105g
Material: Nylon
Craft: integrated molding

MPT-H015

Yellow plastic tap down pen

Size: 14.8*1.6cm
Weight: 105g
Material: Nylon
Craft: integrated molding

MPT-H006

Rubber hammer

Size: 26*7cm
Weight: 176g
Material: stainless steel + rubber
Craft: electroplating

MPT-H009

Tap down hammer

Size: 30.8*9.1cm
Weight: 181g
Material: aluminum + rubber
Craft: oxidation+laser

Usage Scenarios

Suction Cup

Made of thickened natural rubber sole and ABS plastic, very durable and reliable. Maximum vertical pull of up to 110 lbs (approx. 49.9 kg). Using the toughness and deformation of the rubber chassis to generate a vacuum, it can not only be used as a tool for repairing dents in cars, but also can firmly suck in items through air pressure to achieve the purpose of lifting and handling items. Save energy and manpower, improve work efficiency.

[Usage]: Align the suction cup with the center of the dent, combine the handle to generate a vacuum after adsorption, and pull the dent outward with force.

MPT-N0160

Orange plastic suction cup

Size: 11.5*10cm
Weight: 242g
Material: Rubber+ABS
Suction: 50kg

MPT-N0140

Black plastic small suction cup

Size: 5.5*7cm
Weight: 100g
Material: Rubber+ABS
Suction: 25kg

MPT-N062

Aluminum metal suction cup

Size: 11.5*10cm
Weight: 970g
Material: aluminum alloy+rubber
Suction: 50kg

MPT-N0115

Aluminum pull rods

Size: 12*2*5cm
Weight: 100g
Material: aluminum + plastic
Can be used with dent puller

Usage Scenarios

Glue Gun

The hot melt glue gun uses a PTC heating system, which can heat up and release glue within 3-5 minutes. Various wattages are available, can withstand long-term use up to 500 degrees Fahrenheit (about 260 degrees Celsius). A wide range of power options are available to withstand long-term use up to 500 degrees Fahrenheit (approximately 260 degrees Celsius). Safety power switch, LED indicator and smooth propeller all ensure glue flow and stability.

[Usage]: Turn on the switch after plugging in the power, heat the glue for 3-5 minutes and then release it into a fluid state and then use it.

MPT-G001US

Blue Gun Glue

Size: 19.4*16.3*6cm

Weight: 205g

Power: 60-100W

Working voltage: 100-220V

MPT-G080

Black Gun Glue

Size: 19.4*16.3*6cm

Weight: 2318

Power: 20-40W

Working voltage: 12V

PDR-C

MPT-G087US

Glue remover

Size: 30*9.8*4.6cm

Weight: 360g

Power: 300W

Working voltage: 110-220V

MPT-GK0006

Two-color glue sticks 10 pieces/bag

Size: 17*1cm

Weight: 165g,

Softening point: (black)

75 ± 2 °C

Viscosity: 7500±500mpa.s

MPT-GK0007

Yellow color glue sticks 10 pieces/bag

Size: 17*1cm

Weight: 165g,

Softening point: (yellow)

85 ± 5 °C

Viscosity: 5200±500mpa.s

Plastic Tab (Patented)

Each spacer is made of a special hardened material (EVA resin + nylon) and aluminium, making it exceptionally strong and reusable, with a special texture that provides extra grip during use. Different shapes, sizes, ensure dents of every shape and size are repaired, help lift dents, repair car body.

[Usage]: Select the appropriate gasket according to the size of the dent, squeeze out the appropriate hot melt glue from the glue gun, find the center of the dent and stick it on, and use it with T puller or dent puller.

Usage Scenarios

Accessories

We match various auxiliary accessories in the tool set to make your restoration process easier and faster. Similarly, you can mix and match according to your ideas and needs to find a suit that suits you more.
