DE Chère cliente,
Liebe Kundin,
Liebe Kund, sehr geehrte Damen und Herren!

DE Dear customer;

DE Gentili clienti,
Caro cliente,

DE Dear customer;
Thank you for your order!

DE No matter if you bought a piece of furniture made from natural wood, a high-gloss front or a plastic front – every piece of furniture has unique characteristics.

DE Even the texture and structure of wood, such as small knots in natural wood furniture, are part of the individual charisma of each piece of furniture.

DE Since natural wood furniture are permanently exposed to climate and humidity fluctuations, changes to the surface may occur (e.g. hair cracks or changes in colour) in some cases. In general, brightness decreases and colour saturation increases in the course of time – the wood darkens.

DE The changes mentioned above are normal for natural raw materials such as wood. This booklet provides some care tips for enjoyment for a long time.

DE The following applies in general:
• Don't place any hot objects on the furniture.

DE • Don't place candles directly on the furniture.

DE • Immediately wipe off any spilled liquids.

DE • Regularly check if the screws and fittings are tight.

DE • The typical aromatic wooden odour is always a proof of quality for natural wood furniture.

DE • The natural emission of resin may produce bright spots on the knobs which can be polished with a dry, lintfree cloth.

DE • Initially, a slight intrinsic odour is unavoidable for other wooden, paint, leather or upholstery materials too.

DE These odours automatically disappear after a while. If you want to speed up this process, ventilate more often at the beginning and/or wipe off the furniture with a slightly damp cloth which was soaked in water mixed with a small amount of vinegar.

DE • Keep these notes in a safe place.

DE Care notes for furniture made of panel materials

DE We recommend using a soft, lint-free cloth or a shammam for conditioning your piece of furniture made of panel materials.

DE Wipe off the surfaces with a slightly damp cloth or a shammam.

DE The following applies in general:
• Please don't use the following detergents

DE • Cleaning agents at all!
DE • Microfibre cloths or dirt erasers.

DE They often contain fine abrasive particles which can cause scratches on the surfaces;

DE • Aggressive chemical substances or solvents. They may damage the surfaces too;

DE • Vacuum cleaners. The nozzles and brushes can cause scratches on the surfaces;

DE • Sharp abrasives. Roviñerebbero la superficie in modo tale che non sarebbe più possibile ripararla;

DE • Aspirapolvere. Boccette e spazzole possono graffiare le superfici;

DE • Puffritice a vapore. Per via dell'elevata pressione e calore con cui il vapore colpisce le superfici, esse rischiano di deteriorarsi o addirittura a staccarsi dalla sottostitutura.
