

Hapro Trivor

■ *Designing memories*

The Hapro Trivor is the ultimate outdoor roof box. An adventurous travel companion for all who believe no mountain is too high, no valley too deep. The design is sporty, contemporary and offers optimal ease of use - under all circumstances.

The Trivor is Hapro's next step in ergonomic design and ease of use. The innovative, centrally located automotive 'car handles' on both sides offer opening assist: the lid of the roof box is raised a few centimetres when it is unlatched. When the roof box is closed, the handle automatically retracts, and you hear a click when the roof box is securely latched. Keys? You don't need them for opening and closing. Only when you really want to lock the Trivor to keep out uninvited guests. Loading and unloading your luggage has never been easier.

■ Technical specifications

Material and colour

Trivor is available in a range of colours. All Trivor models are available in stylish Brilliant Black and modern Anthracite. Trivor 440 and 560 are also available in the sturdy looking Supermatt Anthracite. The strong and impact-resistant material is highly UV-resistant, ensuring your roof box will retain its colour even in the most extreme conditions.

Reinforced bottom

The metal reinforcement rails along the entire length of the bottom provide strength and stability.

Mounting

The unique, patented Premium-Fit quick mounting system ensures a quick, secure and easy mounting of the roof box. A simple twist of the knob activates the clamps which grip securely around the roof bars.

Opening

Loading and unloading the Trivor is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Double-sided opening

The Trivor can be opened on both sides. An extremely comfortable feature, allowing maximum ease of use when mounting the roof box and when loading and unloading your luggage.

Ergonomic handle

Opening and closing the Trivor is effortless. The ergonomic handle ensures remarkably smooth operation. That way you always have one hand free when opening the roof box.

The handle activates a mechanism (opening assist) that lifts the lid a few centimetres. This makes opening the roof box a piece of cake. When closing the roof box, the handle automatically retracts, and you hear a click. This tells you with absolute certainty that the roof box is securely closed. Lid down. Click. Ready!

The innovative locking system allows you to close the box safely and securely. Without the need for a key. You only use it if you really want to lock the roof box.
