PRODUCT GUIDE 2021

STAFF MODEL

IRONS

Tour-proven performance is the hallmark of our Staff Model Blades. Designed specifically for better players demanding feel and feedback, these Major-winning irons have earned a spot in many Wilson Advisory Staff bags.

PRECISION-MILLED MUSCLE

Precision-milled for precise, consistent weighting and specs from club to club, and set to set.

FLUID FEEL HOSEL

Adapted from our classic Wilson Dyna-Powered irons, this design eliminates unnecessary weight in the hosel, and allows a larger head and wider sole for increased playability.

OPTIMIZED SOLE CAMBER

A slightly more rounded front-to-back sole radius keeps the clubs out of the grass and on the ball for greater consistency.

STAFF MODEL

UTILITY IRONS

Originally created as a prototype iron for professional golfers on the PGA Tour the utility irons deliver an impressive combination of reliability, distance and forgiveness.

HOLLOW BODY LONG IRON SOLUTION

Distance, forgiveness and improved launch culminate in a very playable long iron, which has been refined to deliver optimized launch angles.

HIGH-STRENGTH C300 MARAGING STEEL FACE MATERIAL

A high-strength C300 face delivers greater ball speeds so every shot goes farther.

SOLE WEIGHTING

Seven grams of weight are positioned low in the club head, making the utility irons forgiving and easy to hit with increased launch angles.

TOUR PROVEN. TOUR VALIDATED.

Created to meet the demands of our Tour Staff players, these clubs deliver incredible performance and reliability for golfers who expect the best from their clubs.

STAFF MODEL CB

IRONS

Inspired by our Wilson Staff V6 irons and designed to meet the performance requirements of our Tour Staff players, Staff Model CB irons feature modern control, workability and forgiveness with a classic look and feel that pays tribute to our long history of era-defining irons.

TRI-BRACE STABILIZER™

Our Tri-Brace Stabilizer on the back of the club head helps transfer more energy to the ball while delivering incredible sound and feel.

TUNGSTEN WEIGHTED DESIGN

Twenty grams of high-density tungsten in the toe of long and mid irons enhances head stability at impact and lowers the center of gravity, for reliably consistent shots.

FEEL & FORGIVENESS

Forged 8620 carbon steel face is backed by an integrated impact mass area, providing solid, muscle back-like feel but with a cavity back design that helps to deliver maximum consistency on all types of shots.

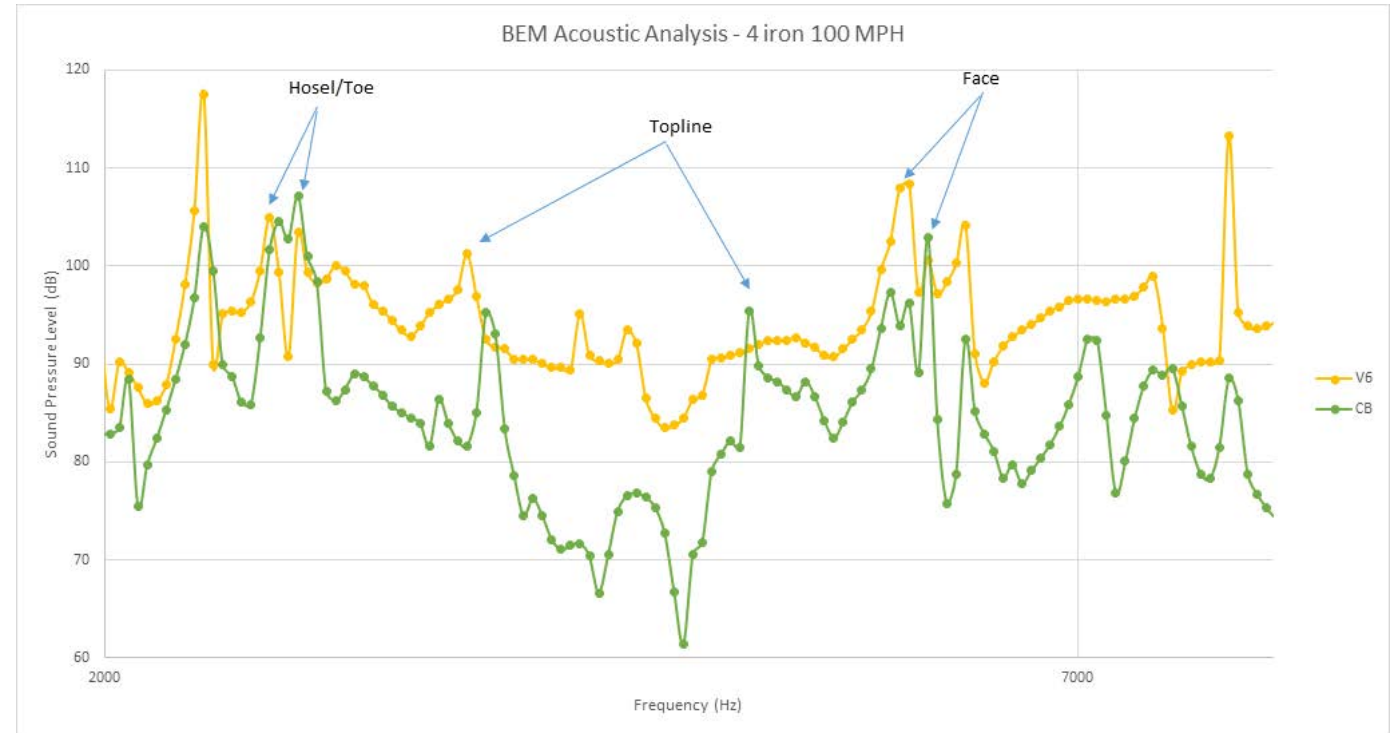

TRI-BRACE STABILIZER

- Structural connection between the topline and the Central impact mass.
- Supports the topline and stabilizes the face of the iron head

TRI-BRACE STABILIZER

- Increases the modal frequencies of the face and topline.
- Reduces the sound produced by the club and ball impact.

PRODUCT GUIDE 2021

D7 FORGED

IRONS

D7 Forged irons deliver Tour-level distance and feel with Power Hole and Power Chamber technologies combined with a compact head shape and thinner topline for true Tour-level appeal.

PATENTED POWER HOLE TECHNOLOGY

Power Hole placement has been optimized for the forged heads, increasing face deflection and contact time between the ball and the face of the iron for more efficient energy return, enhanced ball speed and greater distance.

POWER CHAMBER TECHNOLOGY

This proprietary innovation fills the Power Holes as well as the entire chamber behind the face, resulting in reduced vibration for incredible sound and feel.

FORGED 8620 CARBON STEEL CAVITY CONSTRUCTION

The forged carbon steel and cavity construction beautifully combines the look and feel of a traditional forged iron with game-improving distance.

SUPREME PERFORMANCE IN A PLAYERS DESIGN

Minimal offset, thinner topline and tour styling combine with Power Hole technology for unreal distance.

**BUILT WITH
POWER**

PRODUCT GUIDE 2021

NEW

D9 IRONS

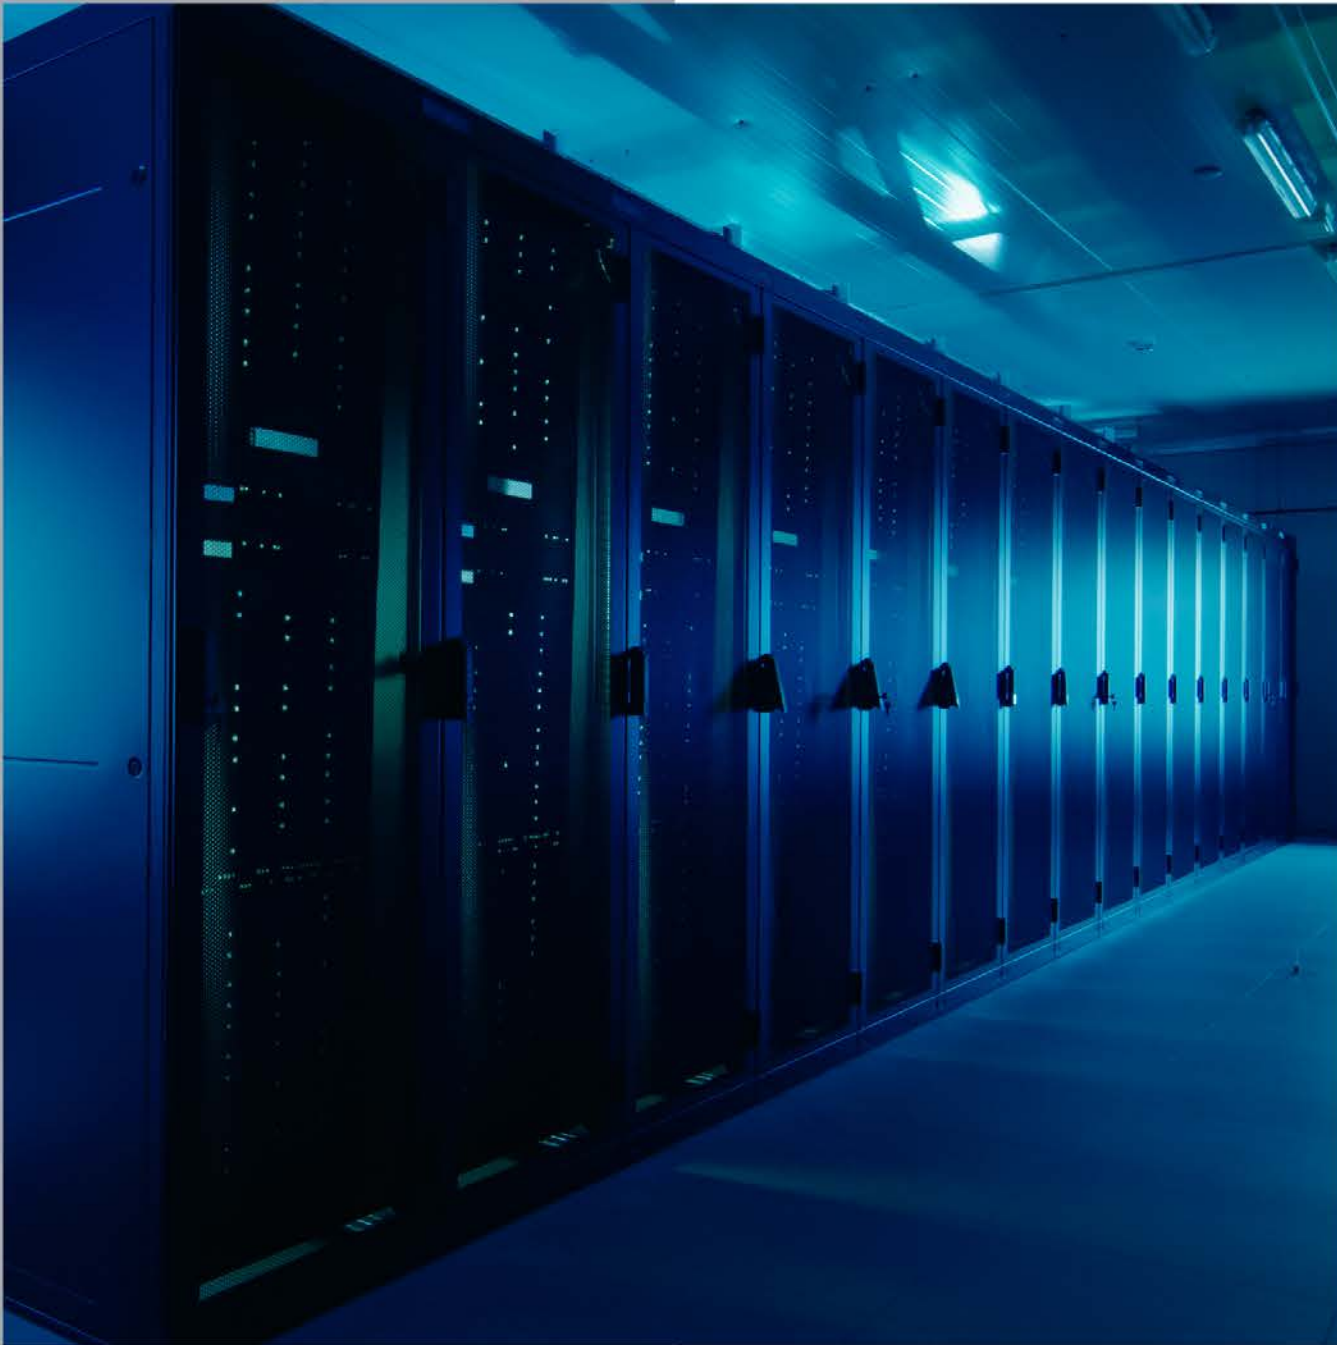

Intelligent Design compared thousands of head shapes and Power Hole arrangements to optimize both distance and ball speed. The result is an iron with higher launch and lower spin with incredible stopping power and pinpoint accuracy.

NEW GENERATIVE DESIGN PROCESS

INTELLIGENT DESIGN

WHAT IS INTELLIGENT DESIGN?

A new generative design process that uses software to evolve a design by simulating small variations.

WHAT MAKES IT INTELLIGENT?

Process requires over 100 processor cores of computing power.

HOW DOES A COMPUTER REFINE A DESIGN?

The software works with our CAD and simulation programs to produce the most effective design possible comparing data across hundreds of generations, or optimized versions, sequentially.

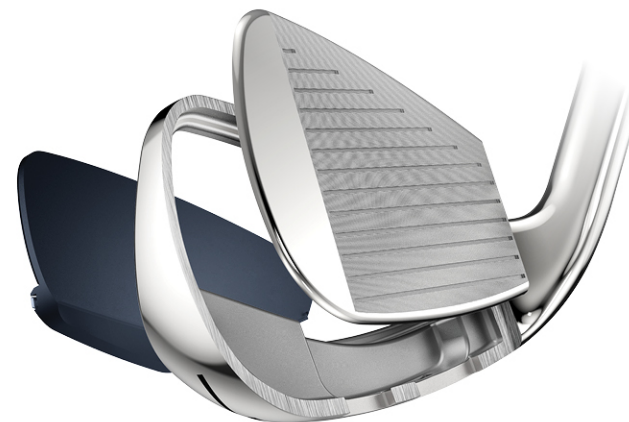

POWER HOLES 2.0

New Power Hole arrangements increase deflection and allow even more energy to transfer to the ball, across the entire face. This means effortlessly higher speeds and greater distance.

ULTRA-THIN FACE

Hot, responsive face provides the ball speed you need to take your game further.

LOW CENTER OF GRAVITY

Our lowest-ever center of gravity improves both launch and spin characteristics for increased workability all around the golf course.

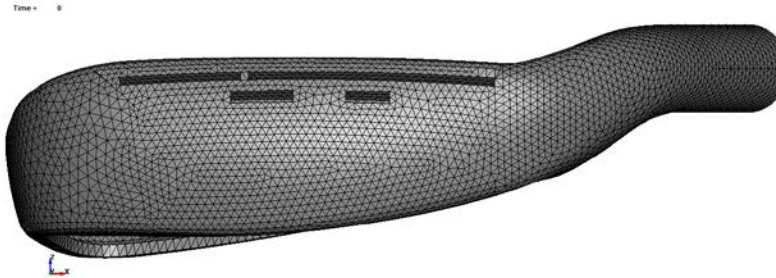

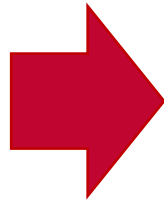

POWER HOLES 2.0

- Simulated Hundreds
- Reviewed several focusing different performance metrics.
- Checked on durability
- Selected out best design

#SAVE
THEGRASS

LAUNCH PAD

IRONS

Wilson Staff Launch Pad irons are packed with features designed to help get the ball airborne, while delivering distance, forgiveness and confidence.

LAUNCH PAD SOLE

The Launch Pad sole design provides exactly what the name suggests, a sole design that effectively floats above the turf, resulting in higher-launching ball flight.

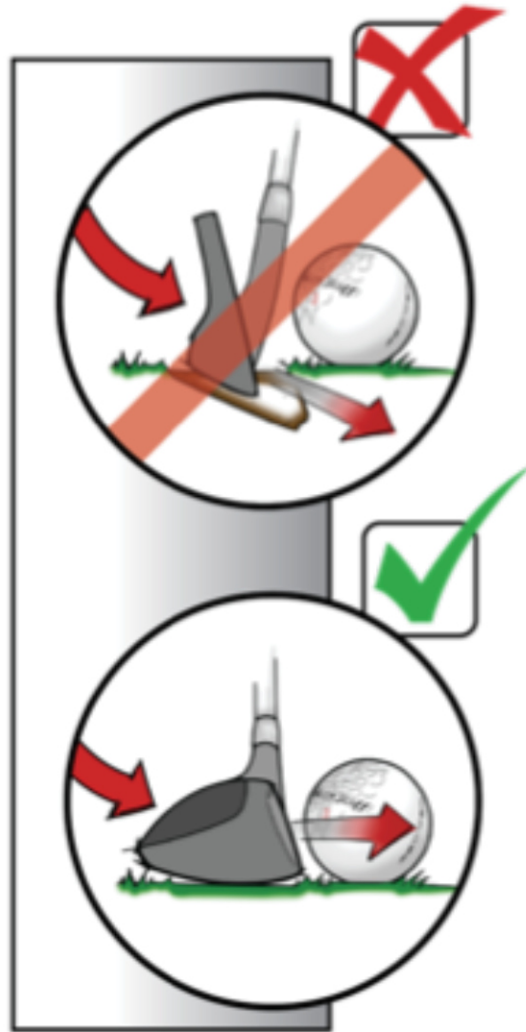

HOLLOW CONSTRUCTION

Hollow construction supports an incredibly thin face for maximum ball speed and increased distance.

DESIGNED TO PUT LONG IRONS BACK IN THE BAG

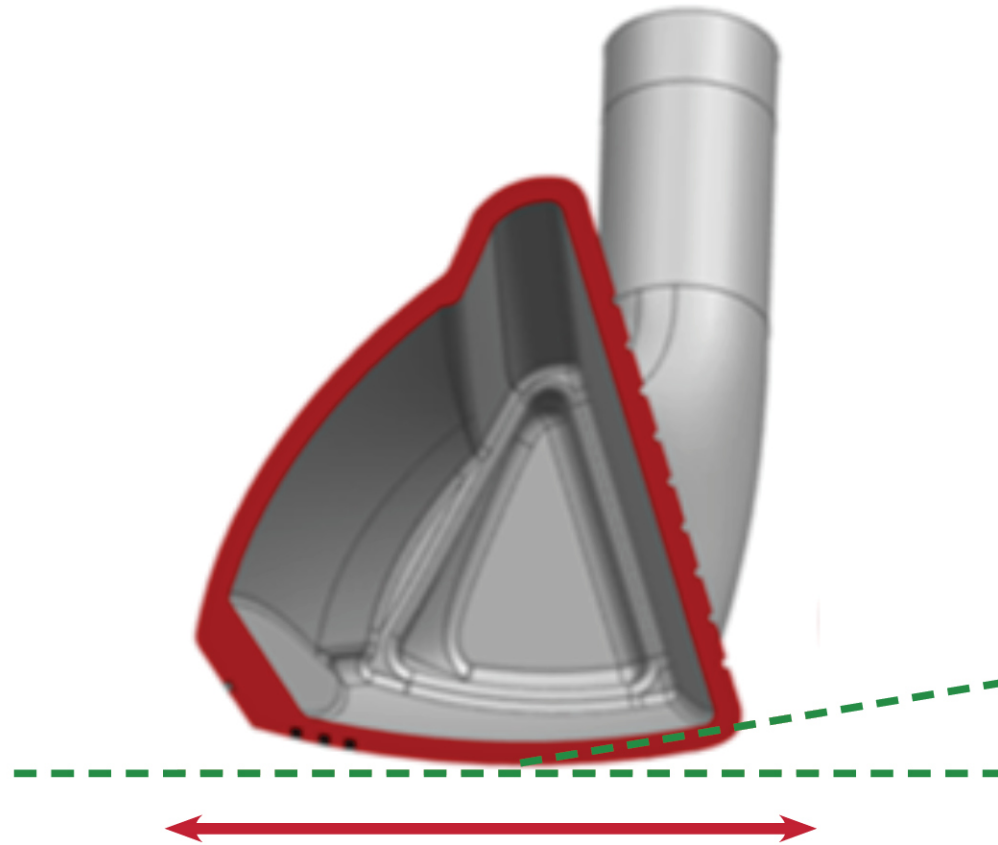

Long irons feature wider, more forgiving soles, with traditional game-improvement sole widths across the shorter irons. The result is consistent ball contact with less chunking and greater distance.

THE PROBLEM

Players want to hit the ball farther, but struggle to hit it consistently on the face.

Experiences frustration and embarrassment with shots that are hit “fat” by striking the turf first before making contact with the ball. The result is that the chunk of grass often travels farther than the ball.

THIN TO WIN: THE LAUNCH PAD SOLE

GENEROUS late breaking bounce angle keeps the leading edge up through ground interaction.

WIDE SOLE with large radius camber prevents the sole from diving deep into the turf.

D9

DRIVER

Using Intelligent Design, we ran thousands of simulations to create a driver that maximizes both speed and distance. The Wilson Labs team worked closely with our Advisory Staff members to develop a precise head shape which provides well-rounded performance off the tee.

PKR FACE – PEAK KINETIC RESPONSE

Every millimeter of the D9 driver face has been fine-tuned for explosive distance and performance. By dividing the face into a series of fractal zones, we've optimized forgiveness and ball speed.

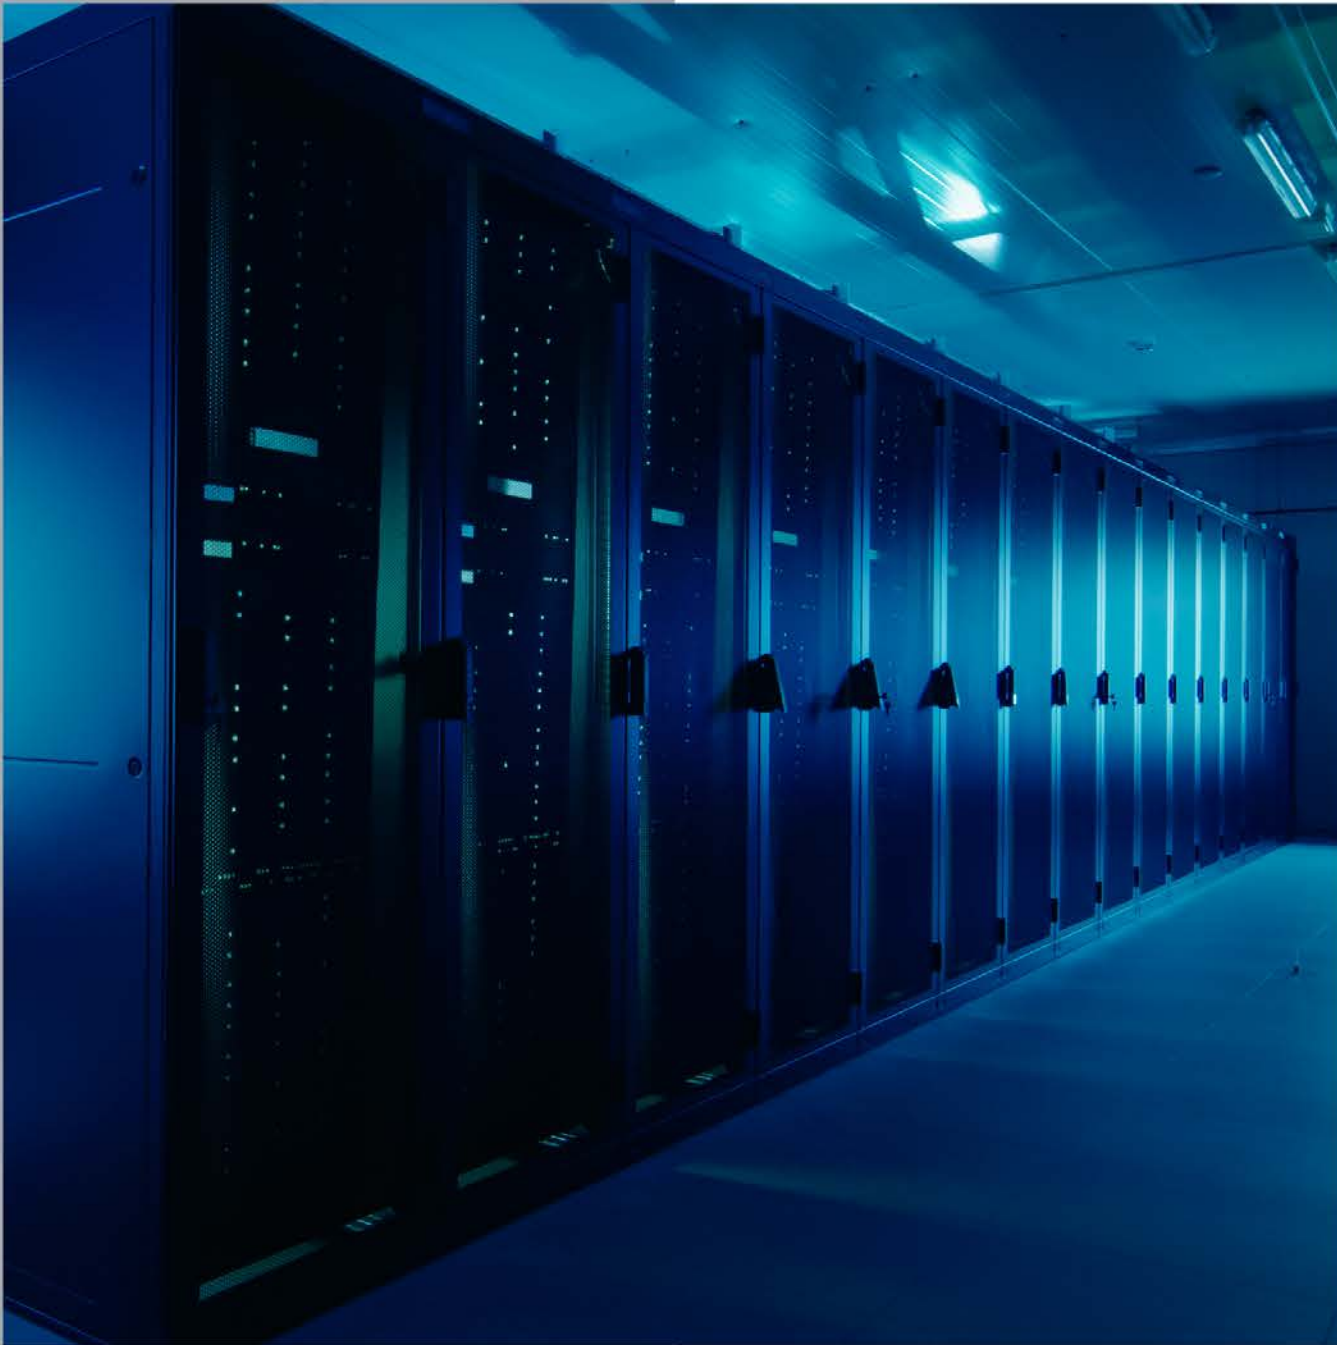

[K]OMPOSITE CROWN

A three-layer crown of Kevlar® sandwiched between woven and unidirectional carbon fiber neutralizes vibration and is incredibly lightweight, which means a lower center of gravity for better ball flight.

OPTIMIZED WEIGHTING

Two weight configurations allow players to choose between a standard 10-gram or superlight 3-gram weight, for increased MOI and added forgiveness on all types of shots.

WHAT IS INTELLIGENT DESIGN?

A new generative design process that uses software to evolve a design by simulating small variations.

WHAT MAKES IT INTELLIGENT?

Process requires over 100 processor cores of computing power.

HOW DOES A COMPUTER REFINE A DESIGN?

The software works with our CAD and simulation programs to produce the most effective design possible comparing data across hundreds of generations, or optimized versions, sequentially.

LAUNCH PAD

DRIVER

The Wilson Staff Launch Pad driver is packed with features like a super lightweight design, moderate hosel offset and our Variable Face technology. The result is a driver that delivers high swing speeds, incredible distance, straighter drives and high launch angles with every swing.

THE SLICE IS SOLVED

The Launch Pad driver is designed to solve golf's most frustrating problem—the dreaded slice off the tee. The moderate hosel offset, combined with 13 grams of weight in the heel side of the club and an upright lie angle will put an end to the slice in your game.

OUR MOST FORGIVING FACE YET

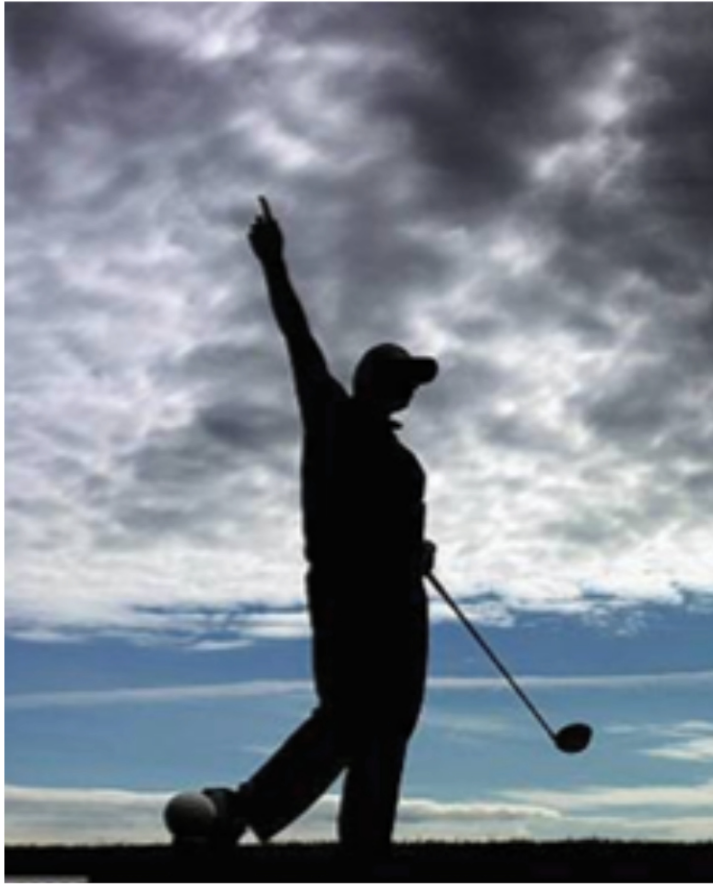

This innovative tech is built into the Launch Pad head and delivers high ball speeds and high launch angles, regardless of where on the face they make contact.

SERIOUSLY FAST CLUB HEAD SPEEDS

The Launch Pad driver is one of the lightest on the market at just 272g. The result is an effortless increase in club head speed for greater launch angles and distance.

TRADITIONAL WEDGES

Wilson® Staff Model wedges deliver short-game confidence and long-term reliability. The soft-forged carbon steel head and precision-milled face are just two of the game-enhancing features that our pro players said they wanted in a wedge. One swing, and you'll understand why.

TOUR PROVEN. TOUR VALIDATED.

Staff Model™ wedges are designed with input from our world-class tour players, who lend their direct feedback on design and performance parameters. The end result is a premium wedge that delivers confidence and control.

SOFT FORGED 8620 CARBON STEEL CONSTRUCTION

8620 Carbon Steel provides a soft touch and incredible feel around the greens.

PRECISION-MILLED FACE AND “ADVANCED SPIN” SCORELINES

Machine-engraved score lines in the precision-milled face feature a higher density pattern for more consistent contact with the ball. The result is maximum spin and control on every shot.

STAFF MODEL

TOUR SOLE WEDGES

Designed for players who prefer a more shallow attack angle and who like to open the face while working different types of greenside shots, the Staff Model Wedge Tour Sole option delivers enhanced versatility for a wider variety of shots around the green. Ideal for tighter lies or firmer course conditions, these wedges will help more technical players get the most out of their game.

TOUR SOLE CAMBER

Splitting the difference between a traditional and wide sole, the Tour Sole supports a shallow attack angle while allowing enhanced shot making versatility.

PRECISION-MILLED FACE AND “ADVANCED SPIN” SCORELINES

Machine-engraved score lines in the precision-milled face feature a higher density pattern for more consistent contact with the ball. The result is maximum spin and control on every shot.

STAFF MODEL

HT WEDGES

Wilson® Staff Model High Toe wedges combine a high toe and wide sole with 431 stainless steel heads and a precision-milled face to give elite players enhanced shotmaking capabilities.

HIGH TOE / WIDE SOLE CONSTRUCTION

The high toe design gives you the flexibility you demand while allowing you to save shots as you approach the green. The face shape and sole allow the club to be played at varying degrees of open or closed configurations, giving you complete control over the amount of face that contacts the ball.

PRECISION-MILLED FACE AND “ADVANCED SPIN” SCORELINES

Machine-engraved score lines in the precision-milled face feature a higher density pattern for more consistent contact with the ball. The result is maximum spin and control on every shot.

PUTTERS

A row of five Wilson Infinite golf club heads is shown against a dark background. Each head features the 'INFINITE' branding and a specific Chicago location: 'WINDY CITY', 'LAKE SHORE', 'GRANT PARK', 'MICHIGAN AVE', and 'THE BEAN'. The club heads are arranged in a slightly overlapping manner, with the 'GRANT PARK' head tilted. The Wilson 'W/S' logo is visible on the back of each head.

**INSPIRED BY
CHICAGO.
DESIGNED
TO PERFORM.**

INFINITE

PUTTERS

The Wilson Infinite Putter line includes seven head shapes in a dark matte finish to reduce glare and accentuate sight lines. Counter-balanced technology provides a more controlled putting stroke.

DOUBLE-MILLED FACE

Promotes consistent impact,
roll and distance control.

PARALLEL & PERPENDICULAR SIGHT LINES

Simplifies alignment for all
players.

DARK ANTI-GLARE FINISH

New ultra-dark PVD finish to
reduce glare and accentuate
sight lines.

COUNTERBALANCED TECHNOLOGY WITH AN ALL NEW FINISH

The Wilson Infinite Putter line includes eight head shapes, from classic to modern, all with refined detailing and counter-balanced technology for total control on the green. Inspired by the company's headquarters in Chicago, each putter is named after a local landmark or neighborhood and features a dark matte finish to reduce glare and accentuate sight lines.

SHAFT: Wilson Staff Infinite

GOLF BALLS
PREMIUM

STAFF MODEL™

GOLF BALLS

Staff Model is a true Tour-inspired, 4-piece urethane ball that's been designed alongside the game's best players to deliver best-in-class performance. No other ball delivers this level of distance, spin or control. Staff Model was made by the best to be played by the best.

V-COR™ ADVANCED PERFORMANCE

A unique core composition magnifies energy to generate maximum velocity off the club face for greater distance performance.

4-LAYER SPIN & CONTROL

More layers. Higher spin. Better control. Unmatched distance and shot-shaping off the tee. Tour-level workability on the fairways. Predictable stability on approach shots and exceptional control around the green.

3SIX2 SEAMLESS URETHANE COVER

Our seamless 362-dimple pattern smooths airflow around the ball for a lower ball trajectory and maximum distance performance.

STAFF MODEL R

GOLF BALLS

Staff Model R is a true Tour-inspired, 4-piece urethane ball that features a raw, unpainted cover which ensures enhanced consistency. Designed alongside the game's best players to deliver best-in-class performance, Staff Model R takes an unconventional approach to deliver straighter flight and confidence with every shot.

UNPAINTED URETHANE COVER

The urethane cover has been left completely unpainted, creating a perfectly even surface for true balance and straighter flight.

V-COR™ ADVANCED PERFORMANCE

A unique core composition magnifies energy to generate maximum velocity off the club face for greater distance performance.

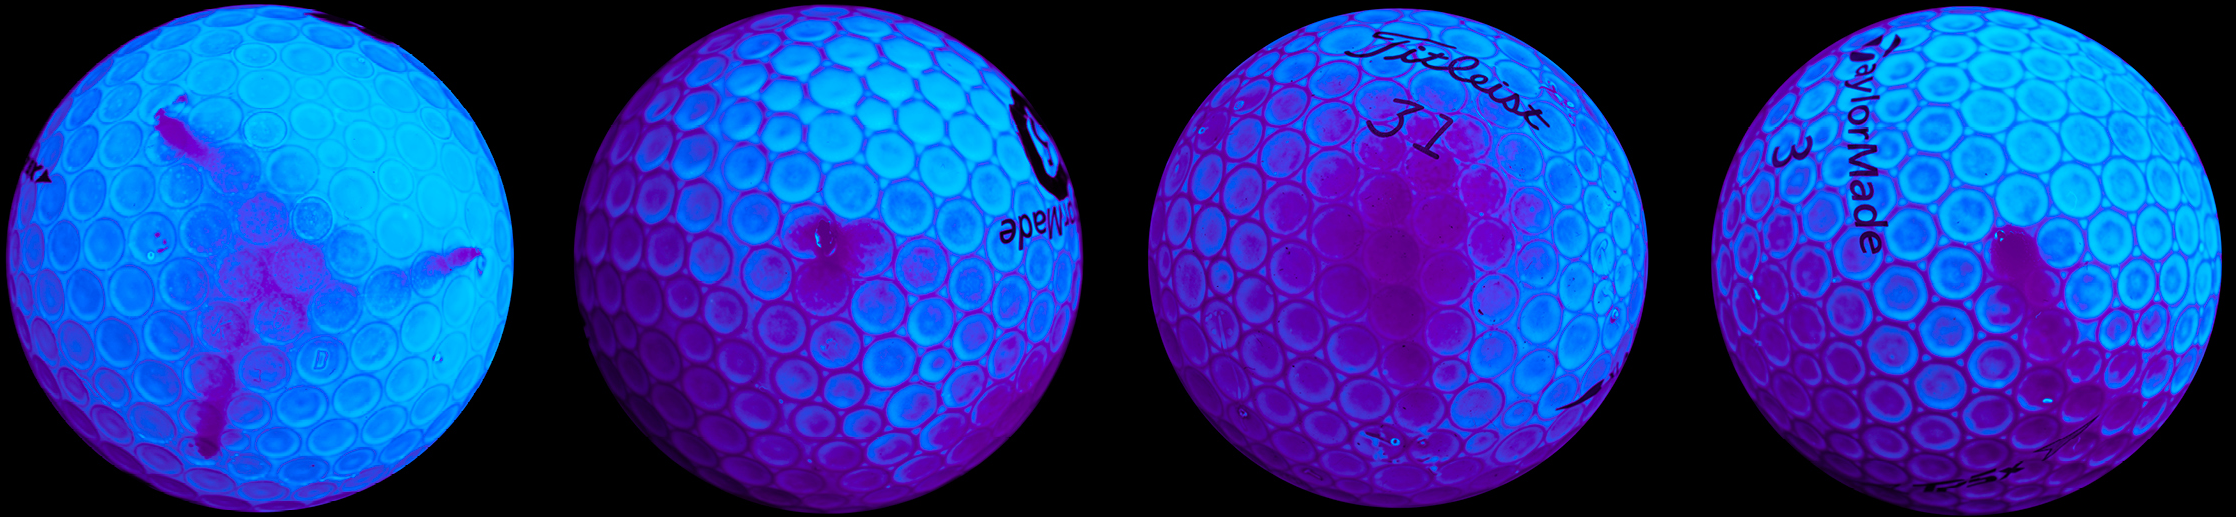

4-LAYER SPIN & CONTROL

More layers. Higher spin. Better control. Unmatched distance and shot-shaping off the tee. Tour-level workability on the fairways. Predictable stability on approach shots and exceptional control around the green.

WHY UNPAINTED

Under ultraviolet light, paint imperfections become visible. What's not visible is how this negatively impacts a ball's flight, spin and roll. We've removed the paint for true consistency and straighter flight.

STAFF MODEL **VS.** STAFF MODEL R COMPARISON - 105 MPH DRIVER

COMPARISON	CARRY	TOTAL	SPIN	9I SPIN	56° W SPIN
STAFF MODEL	265	288	2576	9159	12,426
STAFF MODEL R	266	287	2694	9428	12,688

UNPAINTED BALL EXHIBITS:

Higher spin rate than Staff Model on short irons for better greenside control.

3% Higher on 9-Iron // 2% Higher on 56° Wedge

Same carry and total distance performance as painted Staff Model.

DUO PROFESSIONAL

GOLF BALLS

At 60 compression, DUO Professional takes urethane cover technology to new heights, blending tour-level performance with our best-feeling player's ball.

TOUR SPIN

DUO Professional offers a seamless 362-dimple pattern for enhanced distance and trajectory compared to any 3-piece ball on the market. The urethane cover provides exceptional scuff resistance and optimum green-side spin for optimal feel and control.

LONGER

Flies as long or longer than any competitive 3-piece ball.*

IONOMER MANTLE

Surlyn ionomer blend mantle for soft feel and control on short iron and wedge shots.

*The DUO Professional testing was performed May 24th, 2018 at Wilson FTR (Flight Test Facility) in Humboldt TN.

DUO SOFT+

GOLF BALLS

The world's softest and longest premium 2-piece ball delivers supercharged performance with VelocitiCOR™. Advanced materials in the core amplify every ounce of power from your swing, for greater consistency distance.

VELOCITICOR™

New core technology uses advanced materials to extract and amplify every ounce of power from your swing, making the new DUO Soft+ the world's softest and the longest premium 2-piece golf ball.

ECO

CARRY BAGS

Each and every ECO carry bag is made from over 50 recycled plastic water bottles. This production method uses less energy than using new material, reduces CO2 emissions and keeps plastic out of landfills! Recycling compliance verified by Global Recycled Standard 4.0.

**35 TO 50
BOTTLES
=
1.7 YARDS OF
RECYCLED
POLYESTER
=
1 BAG**

RECYCLED POLYESTER - HOW IT'S MADE

Step 1:

Plastic PET containers are picked up at community recycling centers, then sorted by type and color.

Step 2:

They are stripped of their labels and caps, washed and crushed, then chopped into flakes.

Step 3:

The flakes undergo a second melting and are made into consistently shaped pellets.

Step 4:

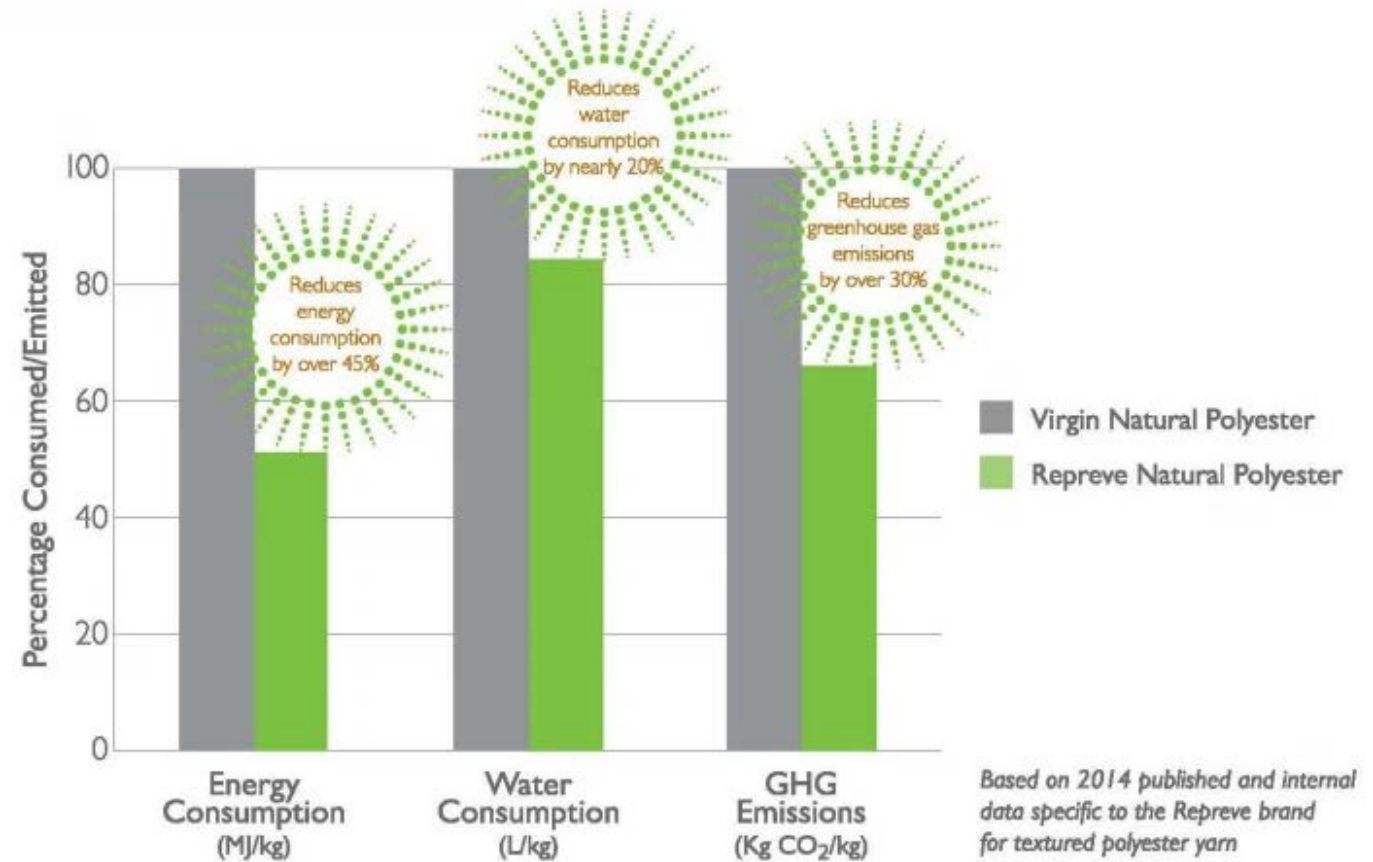

The pellets are melted and extruded to make fiber. The fiber is crimped, cut, drawn and stretched, then baled.

Step 5:

The baled fiber can be processed into fabric for a variety of textile product end uses.

RECYCLED POLYESTER IS JUST AS GOOD AS VIRGIN POLYESTER - BUT TAKES A LOT LESS RESOURCES TO MAKE!

Recycled polyester is almost the same as virgin polyester in terms of quality, but its production requires **59 PERCENT LESS ENERGY** compared to virgin polyester. Manufacturers of recycled polyester, aim to **REDUCE CO2 EMISSIONS BY 32 PERCENT** in comparison to regular polyester. In addition, recycled polyester can contribute to reduce the extraction of crude oil and natural gas from the Earth to make more plastic.

A design based on the preferred tour style with a higher front and wrapped finish trim.

QUICK-DRY SWEAT BAND

Breathable, soft cover designed to dissipate moisture.

ADJUSTABLE CLOSURE

One size fits most with easy-to-adjust secure back.

BLACK

WHITE

NEW

RAIN BUCKET

SEASONAL HEADWEAR

The Rain Bucket hat is sure to be your favorite foul-weather friend. It combines a secure fit with premium weather protection to ensure a little rain never spoils your round.

NEW PROFILE DESIGN

Low profile fit forms to the head and keeps it in place.

WATERPROOF CONSTRUCTION

Seamed stitch lines, an extended back and moisture repellent fabric keep you dry during the worst weather.

DRAWSTRING CLOSURE

One size fits most adjustability with drawstring closure for secure fit.

NEW

TOUR BEANIE

SEASONAL HEADWEAR

Keep the cold at bay with the Wilson Tour beanie. This stylish and versatile cold-weather beanie protects your ears and head from wind and cold, perfect for those late fall and early spring rounds.

JACQUARD

Soft, tightly woven acrylic with branded pattern.

INNER FLEECE LINING

Internal fabric layer adds a snug fit and extra warmth.

ONE SIZE FITS MOST

Stretchable band provides a comfortable fit for most head sizes.

NEW

ECO BEANIE CAP

SEASONAL HEADWEAR

All the protection, warmth and style of our Tour beanie, but made from recycled materials that eco-conscious players love.

OUTER SHELL

Soft, recycled poly yarn for sustainable comfort.

DOUBLE LAYER WARMTH

Second fabric layer adds durability and warmth.

ONE SIZE FITS MOST

Stretchable band provides a comfortable fit for most head sizes.

NEW

IVY CAP

SEASONAL HEADWEAR

Old-school cool is where it's at with the Ivy cap. Duck bill and stretch fabric for style and comfort from the tee box to the clubhouse.

CLASSIC STYLING

Nostalgic duck bill Ivy cap to walk the course in style.

COMFORTABLE FABRIC

Stretch T/R 46S material for breathable comfort while wearing.

ONE SIZE FITS MOST

Velcro fabric closure provides a comfortable fit for most head sizes.

GREY

TOUR UMBRELLA

ACCESSORIES

Battle the elements with the stylish Wilson Tour Umbrella, as used on tour by the Wilson Advisory Staff members.

NEW

CADDIE TOUR TOWEL

ACCESSORIES

Highly absorbent and quick drying, this large golf towel is perfect for drying balls, wiping down clubs and keeping your hands clean. Features a hang loop so it's always ready to go.

NEW

MICROFIBER TOWEL

ACCESSORIES

The new trifold towels are made from microfiber that feature a waffle-like weave pattern intended to keep your clubs clean and dry. The sturdy carabineer clip attachment makes for easy clipping on and off your bag.

NEW

TRAVEL GEAR LOGO

ACCESSORIES

Golf clubs aren't the only things that need protection when you travel. That's why Wilson Staff offers a line of clean, modern luggage, bags and packs. Thoughtful features and robust construction make them ideal travel companions whether it's for business or to distant courses.

TRAVEL GEAR

ACCESSORIES

Get protection and style when you hit the road with Wilson Staff travel accessories. With thoughtful appointments and robust materials like hard ABS plastic topsides and reinforced handles, this gear ensures that you and your equipment will arrive ready to play.

BRIEF PACK

DUFFLE BAG

WHEEL BAG

HARDTOP TRAVEL COVER

GOLF PRO TRAVEL COVER

FLIGHT COVER

ACCESSORIES

For the ultimate in protection when flying with your clubs, the Wilson Staff flight cover offers complete padded protection against everything mother nature or the airlines can throw at it. Durable nylon exterior with heavy-duty zippers, security straps and integrated wheels make flying with your clubs a walk in the park.

PROSTAFF®

MEN'S ADULT COMBO

Wilson® Men's ProStaff Combo Iron set is an innovative combination of five very forgiving deep-cavity irons and an advanced hollow mid-iron. Two easy-to-hit hybrids replace the longest irons.

AVAILABLE IN

Right Hand

Includes

Hybrids 4, 5
Irons 6, 7, 8, 9, PW, SW

EASIER TO HIT

Replace long irons with hybrid and hollow irons that produce greater distance.

SUPER GAME IMPROVEMENT

Technology enhances intermediate golfer experience by helping them improve faster.

DESIGNED TO LAUNCH

Low center of gravity improves launch trajectory and produces greater distance.

PROSTAFF®

WOMEN'S ADULT COMBO

Wilson® ProStaff Women's Combo Iron set features the same super game improvement technology but utilizes lighter weight components, adjusting shaft flex, club length, grip size and swing weight to better match the physical geometries of women players.

AVAILABLE IN
