

## AML Quality Policy

AML provides ocean sensing solutions. We help our customers remove unpredictability - both economic and technical - from their survey and environmental monitoring operations.

Our aim is to provide the best customer experience to blue organizations. We do this by promoting a customer-focused culture within our teams, listening to our customers and tracking their satisfaction, producing reliable, innovative products that save our customers money, and providing fast support and product availability that delivers to agreed upon dates.

Our promise to our customers is "We Make it Easy", with commitments to product satisfaction, purchase, support, and OEM partner integration.

At AML, we are committed to the continuous improvement of our ISO 9001-certified Quality Management System and conforming to all applicable regulations.

A handwritten signature in black ink, appearing to read 'Robert Haydock', is centered on the page. The signature is fluid and cursive.
