

3 Pt. Retrieval Systems

RT1303-001 Super Duty Retrieval Head on 3 Pt.

The Andros Jr. Retrieval Systems are used for small to mid-sized drip tape users (1-25 acres), will find this sturdy 3-Point mounted on Retrieval System to be an efficient and cost effective solution for retrieving above-ground drip systems.

With a wide variety of attachments, this system can be configured to retrieve tape or hose for re-use, recycling, or disposal.

When outfitted with the Andros Universal Retrieval Head, this system can effectively wind up surface applied tape for recycling, or Trash Spool for reuse.

The modular design of the Universal Retrieval Head allows the customer to control costs by selecting only the features required for optimum performance.

**Starting with the basic Junior Head Model, users can add such performance enhancing options such as, pressure sense, tension control, a Level-Wind system for automatic traversing, or optional digital linear measuring system.*

Specifications

Hydraulics - 4-GPM open or closed center
Cat II - Free and Quick
Easy Drain Spool Support

RT1302-002 Trash-Spool on 3 Pt.

RT1302-001 Spool Carrier on 3 Pt.
