

"Genie" Lay-Flat Retrieval Machine

LF0601-001 Self Powered Genie

The "Genie" from Andros is a self-propelled installing and retrieving machine that is ideally suited to retrieve and layout hard to handle materials such as lay-flat hose.

Additionally, this machine is used in conjunction with our 36" heavy duty Agri-LF-Spool, and all types of lay-flat hose can be safely and efficiently retrieved and laid out by a single person.

FEATURES

- Honda Powered.
- Ground Following Articulating Platform.
- User Steerable controls.
- Hydraulic lift like a forklift.
- Dual Controllers one at the handle one at the spool.
- Safety "Stop" Button.
- Adjustable Spool Shaft.
- Variable Speed Controller.

There are a selection of Agri-LF-Spools available for your application from 28" to 36" diameter, including a variety of widths.
