

# TapeMaster DTR

The TapeMaster combines two of the most widely used Andros products into one compact, heavy duty drip tape pulling machine. Designed for removal of drip tape for disposal, this new machine combines the tape lifting abilities of the Andros Digger Machine with the unparalleled drip tape compaction of the Andros Ultra-binder. The result is a tape pulling machine that is safer, faster and narrower than anything we have produced until now.

The compact design is perfect for smaller tractors with 100 horse power, or even less, depending on the depth of the tape and soil type. The heavy-duty design provides long life under adverse field conditions. This machine will dig to a maximum depth of 12-inches and compact drip tape into a dense coil for easy recycling or disposal.

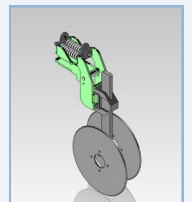

## Features:

- Narrow, compact design
- Operator station with optional Lexan viewing area
- Auto dump with deflection plate
- Variable speed, controlled by operator
- Easy side access operators station
- Additional row spacing available upon request
- Reduces manual field labor
- Eliminates tape trash in the field
- Can be configured to retrieve plastic mulch

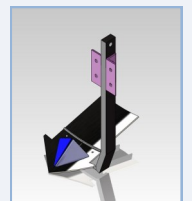

## Accessories can include:

- Double, adjustable width, spring breakaway, 20" heavy-duty coulters wheels
- Heavy duty 2X4 undercutters/lifters
- 15" wide lister blades
- Extra safety package available
