

Stability. Flexibility. Reliability.

Featuring a synthetic plate with drain and a powder coated RAL 9002 frame, the Pannomed EPT is as steadfast as it is aesthetically pleasing. The chassis was designed for the utmost stability. Foot-controlled electronic height adjustment offers the capability to service animals of all sizes, and four tie-down hooks allow for complete control over even the most anxious patients. The Pannomed EPT's work surface measures about 51" (130cm) x 23.5" (60cm), and is suited perfectly for lifting sizeable animals from floor to counter height. The synthetic scratch-proof top promotes animal stability and provides a much warmer surface than traditional stainless steel table tops.

Battery Backup
Available
