

AccuPen

Handheld Tonometer

Portable, easy to use, and versatile

The AccuPen - Handheld Applanation Tonometer is portable, easy to use, and versatile. It provides fast measurements with patient in any position. The built in IOP Correction Calculator adjusts IOP based on corneal thickness.

FEATURES

- Gravity Offset Technology provides accurate IOP measurements with less calibration in any testing position.
- New ergonomic design allows for easy visualization of the cornea.
- Low cost battery takes up to 15,000 readings.
- Self Calibrating. No more up and down and around.
- Large LCD Display stores up to 9 measurements with a calculated average.
- Adjusted IOP Calculation to correct for varying CCTs.
- Comes with heavy duty traveling case and lanyard for easy transportation

SPECIFICATIONS

Weight:
3.0 oz.

Dimensions:
7" x 1"

Transducer Dimensions:
1.0mm diameter

Accuracy:
+/- 2mmHg (compared to
Goldman Tonometer)

Measurement Range:
5-60mmHg

Power Source:
3.6 V Lithium Battery
