

Haico Diagnose 1

Equine Operating Table

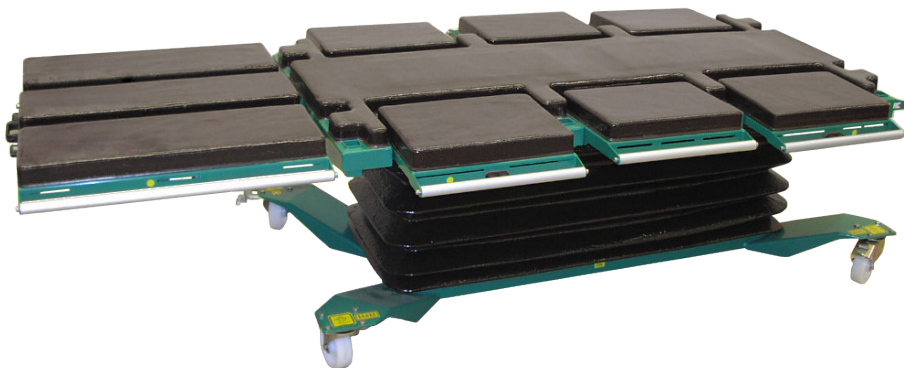

A low voltage unit that promotes safety in the operating room

The Haico Diagnose 1 Equine Table is a low voltage unit that promotes safety in the operating room. One of the most popular tables from the leading Haico brand, the Haico 1 combines powerful stainless steel construction with unique ergonomic features.

Load and position the animal with the Haico's adjustable height feature. The table can be lowered down to 12 inches, then raised all the way to 44 inches, allowing the staff to work comfortably. Once the table is loaded, clinicians can use the velcro binding straps and the hydraulic head and side supports for secure positioning. The table's side panel design allows clinicians good access to the operative field — increasing safety for the horse and the clinical staff.

FEATURES

- Two-inch padding with unique, protective surface coating for quick and easy cleanup.
- All elements of the table are fully shielded against dust and water, allowing clinicians to power wash the unit between procedures.
- Powerful, quality steel construction designed for years of use.
- Five-inch lockable casters, stainless steel for durability.
- One caster features directional locking for stability.
- Hydraulic head support and side panels allow for precise positioning for each procedure.
- Table height adjusts from 12 to 44 inches, for more loading options and increased clinician access.
- Additional features include longitudinal tilt, remote control and automatic system monitoring
