

Avante Integra SP II

Anesthesia Machine

Perfect for larger veterinary surgery suites that may be using more than one type of anesthetic agent

The Integra SP II holds two vaporizers and due to its wider stance, has a larger work area. The recessing absorber and ventilator bellows assembly is utilized in both the Integra I and II. Only two preventive maintenances are required each year, as opposed to the standard four per year of other models.

The Integra SP II carries a 2-year Manufacturer Warranty and optional Service Training Program. The Integra line complies with CE, ISO, and other International Standards.
