

Newport e360

Ventilator

Full-featured, compact ventilator

The Newport e360 is a full-featured, compact ventilator with FlexCycle, a patented feature that actively manages cycling off timing. Works for critical or long-term care. The e360 includes comprehensive mode selections with an intuitive interface that makes this sophisticated technology easy to use

FEATURES

- Designed with modern safety features at its core.
- Includes a measured, imposed breathing value to help guide weaning decisions.
- Volume Targeted Pressure Ventilation.
- E360 Graphical User Interface touchscreen.
- The e360 T model includes a 15" external touchscreen that allows for expanded viewing.
