

Pannomed EPT

Veterinary Mobile Treatment Table

Designed Specifically for Performance in Veterinary Exam & Procedure Rooms

Featuring a synthetic plate with drain and a powder coated RAL 9002 frame, the Pannomed EPT is as steadfast as it is aesthetically pleasing. The chassis was designed for the utmost stability. Foot-controlled electronic height adjustment offers the capability to service animals of all sizes, and four tie-down hooks allow for complete control over even the most anxious patients. The Pannomed EPT is suited perfectly for lifting size-able animals from floor to counter height. The synthetic scratch-proof top promotes animal stability and provides a much warmer surface than traditional stainless steel table tops.

FEATURES

- 250 lb weight capacity
- Height adjustment by foot control
- Chassis of maximum stability
- Powder coated RAL 9002
- Synthetic plate with drain
- Four tie-down hooks
- Safety switch rod
