

# Pannomed OP-System X-Top

## Surgical Table

### High-end table for advanced procedures

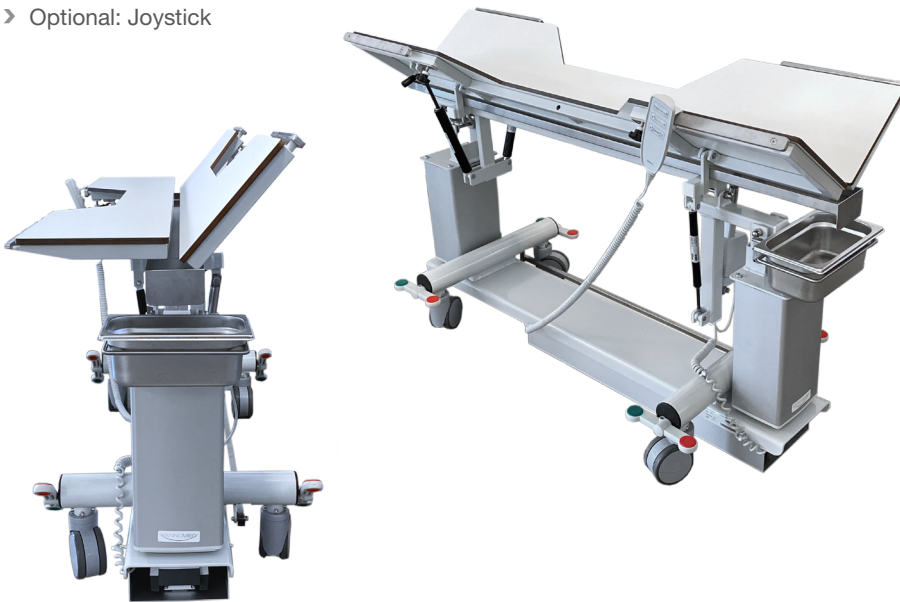

The OP-System X-Top is designed for complex veterinary surgeries and procedures. It provides stability, adjustability, and accessibility needed for ophthalmology, orthopedics, and more.

#### FEATURES

- › Lifting column chassis of highest stability
- › Individually removable and re-installable laparoscopy cut-outs on both sides (also allows for closer access to the patient)
- › Developed for complex procedures and surgery - also possible while seating
- › Expanded space underneath table top compared to previous version due to optimized design
- › Double castors with directional and central locking mechanism by actuating a single pedal
- › Detachable and easy-to-clean drain gutter and drip tray for collecting excess liquids

#### BASIC EQUIPMENT

- › OP-System with castors
- › OP-Rails (4 pieces on longer side)
- › Removable laparoscopy cut-outs (2 pieces)
- › Hand switch
- › Optional: Joystick
