

# Steris SurgiGraphic 6000

## Surgical Table

### Enables radiology-quality images for minimally invasive procedures

The Steris SurgiGraphic 6000 Surgical Table is a very precise surgical table that enables radiology-quality images for minimally invasive procedures. Longitudinal and lateral float, Trendelenburg, Reverse Trendelenburg, lateral tilt, height adjustable, and any combination in between make for a very versatile surgical table.

#### FEATURES

- 83 inches of full unobstructed viewing for maximum imaging capabilities.
- High quality imaging.
- Smooth longitudinal and lateral float.
- Patient capacity rated at 500 lbs.
- Table auto corrects deflection caused by patient weight.
- Advanced locking mechanism has eight points of contact for critical stability.
- Easy to maintain- brushed surgical stainless steel, enclosed casters, and the accordion style upper column is designed with an easy-to-clean-surface.
- Surgeon Palm Control has precise control of every movement of the table including a safety lock out function.
