KNOW YOUR PLAN

Understanding Your **Health Coverage**

Healthcare doesn't have to be complicated. Here's a helpful list of common terms so you can choose the right plan for you and your family.

Premium

What you pay each month to have health insurance. Think of it as a monthly subscription to keep your coverage active.

Copay

A flat fee you pay for doctor's visits, medications, and services. Copays are the same amount every time, so there are no surprises at the doctor or pharmacy.

Deductible

The amount you pay out-of-pocket for doctor's visits, medications, medical supplies, and other healthcare services before your insurance shares costs with you.

Note: Copays and your monthly premium do not count toward your annual deductible.

Coinsurance

Your coinsurance is the percentage of your healthcare costs that you share with your health plan after you meet your annual deductible.

Out-of-Pocket Maximum

The most you'll pay in a year for covered, in-network care. Once you hit this number, your plan covers 100% of covered services for the rest of the year. Consider this your financial safety net for large medical bills.

Note: Your monthly premium does not count toward your out-of-pocket maximum.

Primary Care Provider (PCP)

A provider you see for most of your everyday care. PCPs can treat many common illnesses and conditions and offer routine checkups. They can also refer you to specialists when needed.
