(HRV) OPĆENITO

Okomite litice na početku baščanske kotline pronašao je Tomaž Košir, 1997.god. Iste godine opremio je prvih šest smjerova u centralnom sektoru, ali trebalo je 10 godina za idući veliki korak. U studenom 2007. Tomaž, Daša Novak, Sandra Jerčinović i Žarko Seršić započeli su s planskim razvojem područja, koje sada obuhvaća nekoliko sektora i još uvijek ima mnogo mogućnosti ...

PREPORUČAMO, da za vrijeme penjanja i osiguravanja uvijek nosite kacigu! Posebno budite oprezni kada su iznad stijene ovce (rijetko, ali moguće)!

STIJENA: Oštar, vodom erodiran vapnenac.

KARAKTERISTIKA: Položeno, okomito i prevjesno.

SIGURNOST: Vrlo dobra, uglavnom INOX oprema.

ORIJENTACIJA: Sjevero-istok i istok.

NAJPOGODNIJE DOBA: Idealno u proljeće i jesen. U sredini ljeta moguće je penjati popodne (hlad od 13h). Za vjetrovitih zimskih dana je obično prehladno.

(SLO) SPLOŠNO

Stene nad začetkom baščanske doline je leta 1997 našel Tomaž Košir. Istega leta je uredil prvih šest smeri, do naslednjega večjega koraka pa je žal trajalo kar 10 let. Novembra 2007 so Tomaž, Daša Novak, Sandra Jerčinović in Žarko Seršić pričeli sistematično urejati področje, ki ga sedaj sestavlja več sektorjev, potenciala za nastajanje novih smeri pa je v plezališču in bližnji okolici še veliko ...

PRIPOROČAMO, da med plezanjem in varovanjem vedno uporabljate čelado! Še podebej pozorni bodite, če se nad steno zadržujejo ovce (redko a možno)!

SKALA: Oster, od vode razjeden apnenec.

TIP : Položne in navpične plošče, včasih previsi .

VAROVANJE: Zelo dobro, v glavnem INOX oprema.

ORIENTACIJA: Severo-vzhod in vzhod.

SEZONA: Idealno pomladi in jeseni. Poleti je možno plezati popoldne (senca od 13h). Na vetrovne zimske dni bo za plezanje verjetno prehladno.

(ENG) GENERAL

Vertical crags above the beginning of Baška valley were discovered by Tomaž Košir, back in 1997. At the same year he bolted first six routes in the central section, but it took 10 years for next big steps to be taken. In November 2007 Tomaž, Daša Novak, Sandra Jerčinović and Žarko Seršić started with systematic development of the area, which now hosts several sectors and still has a lot of potential ...

NOTE that it is advisable to always wear helmet while climbing or belaying! Take special care when you see sheeps above the crags (rare but possible)!

ROCK: Sharp, water eroded limestone.

TYPE: Face, vertical and overhanged.

PROTECTION: Very good, mainly INOX equipment.

EXPOSURE: North-East and East

BEST SEASON: Ideal in spring and autumn. In high summer it is possible to climb in the afternoon (shadow from 1pm). On windy winter days it will get too cold.

PORTAFORTUNA AREA

(HRV) PRISTUP

Pratite cestu Baška – Punat, ili iz suprotnog pravca, i parkirajte auto ispod prelaza Treskavac (10 km od Baške), na parkingu preko puta stare plave zgrade, nekadašnjeg disco kluba Portafortuna (GPS: N 45.02162, E 14.68318). Ovdje već možete vidjeti penjalište na padini s vaše JZ strane. Hodajte 100 m cestom u smjeru Punta, preko mosta, do uređenog izvora vode (slavine) s lijeva. Započnite uspon odmah iznad slavine, prateći stazu koja će vas nakon 20 m dovesti do vrata za ovce (zatoke). Prođite te ovdje nastavite desno i dalje prateći stazu u smjeru litica, kroz još jedna vrata za ovce, dok ne dođete do sipara. Nastavite lijevo kroz šumu i dalje najočitijom stazom dok vas ne skrene izravno uzbrdo i dovede pod sektor C. 20 minuta hoda od parkirišta.

Molimo, zatvarajte za sobom sva vrata (zatoke) zbog ovaca i držite vaše pse na uzici!

Ne parkirajte kod izvora vode jer je tamo dozvoljeno samo zaustavljanje na nekoliko minuta. Hvala!

(SLO) DOSTOP

Sledite cesti Baška - Punat in parkirajte pod prelazom Treskavac (10 km od Baške), nasproti stare modre stavbe (nekoč diskoteka Portafortuna) (GPS: N 45.02162, E 14.68318). Od tu, na pobočjih SZ od vas, že lahko vidite plezališče. Hodite po cesti proti Punatu 100 metrov, preko mostu, do urejenega vodnega izvira na vaši levi. Tu zavijte v breg in nad izvirom sledite stezi, ki vas bo kmalu pripeljala do prvih vrat v ogradi. Držite se desne in nadaljujte po poti, višje skozi še ena vrata v ogradi, dokler ne dosežete spodnjega roba melišča pod stenami. Po dobro uhojeni stezi nadaljujte skozi redki gozd proti levi, dokler se ta ne obrne naravnost proti stenam in vas pripelje pod sektor C. 20 minut hoje od parkirišča.

Prosimo, da za seboj vrata vedno pustite zaprta in da imate pse ves čas na vrvi!

Svojega avtomobila ne puščajte poleg izvira, saj je tam dovoljeno le ustavljanje za nekaj minut. Hvala!

(ENG) ACCESS

Follow the road Baska - Punat or vice versa and park your car bellow Treskavac pass (10km from Baska), on a parking place opposite to old blue building, once known as disco club Portafortuna (GPS: N 45.02162, E 14.68318). You can already see the crags at the slopes on your SW side from there. Walk 100 meters towards Punat, over a bridge, and find a maintained water spring on your left. Start hiking uphill just above the pipe, following the footpath that will soon enter the fence. Keep right and follow the path through another fence door, until you reach the bottom of a scree. Enter the woods on your left, still following the path until it will turn directly uphill and bring you under the sector C. 20 minutes of walking from the parking place..

Please, always keep all fence door closed behind you and keep your dogs on leashes!

Never leave your car near the water spring as it is only allowed to park there for a minute or two. Thanks!
