

Powder Design for Additive Manufacturing

PhD student: Hans Gruber

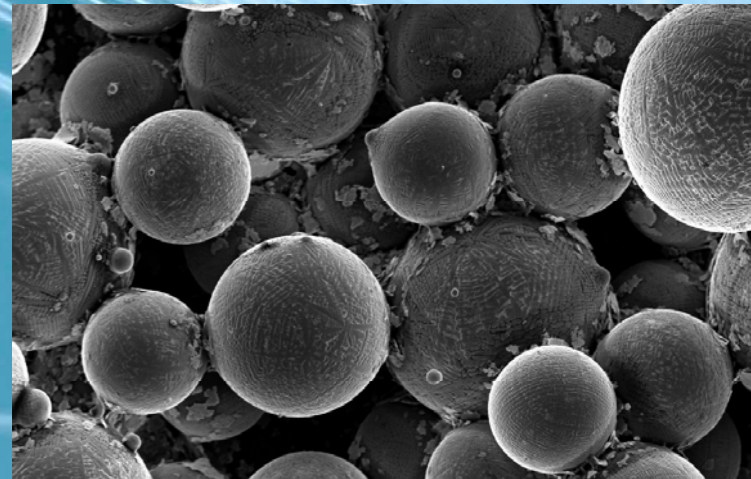

Duration: 2016.06 – 2021.06

Funding: Vinnova

Advisor: Eduard Hryha

Optimization of powder properties for additive manufacturing (AM) :

- Mapping of powder properties
- Tailoring of powder alloy composition to fit AM processing
- Recyclability of powder for AM
- Effect of AM process parameters on the powder properties
- Relationship between powder properties and AM component properties
