

Densification of Powder Metallurgy Parts by Hot Isostatic Pressing

PhD student: Maheswaran Vattur Sundaram

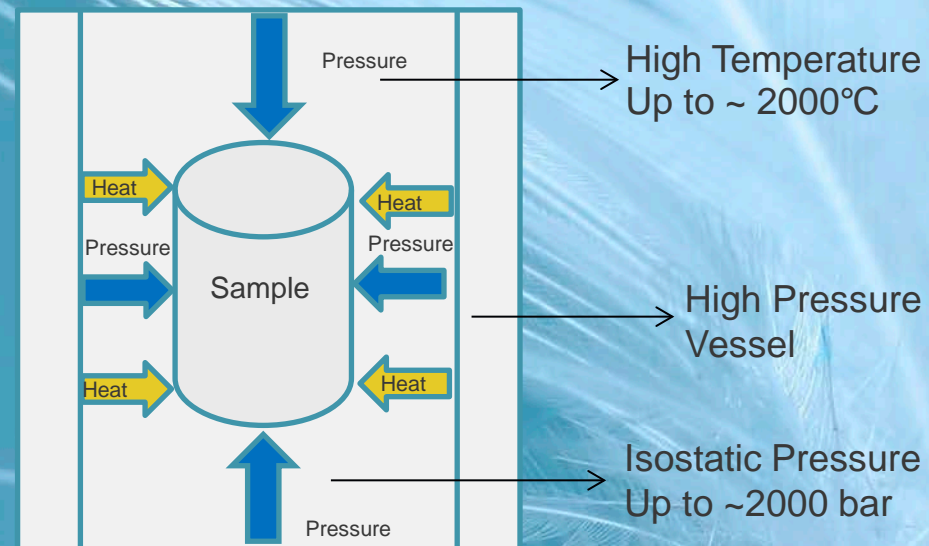

Duration: June 2014- June 2019

Funding: Vinnova

Advisor: Lars Nyborg/Eduard Hryha

Research Scope:

- Achieving higher densities for higher performance applications
- By studying the metallic powders behaviour with HIPping

Hot Isostatic Pressing (HIP)

LIGHTer

Department of Materials and Manufacturing Technology

Project partners : Main partners Swerea KIMAB, Avure, Höganäs, Volvo AB
