This is the bike that Peloton Magazine says is: “equipped perfectly as a long miles campaigner, with plenty of performance on the hypoxic edge for the screaming fast club ride... under big watts is among the stiffest endurance bikes we’ve ridden.”

ENGINEERED FOR ENDURANCE: Our Topological Compliance System gives you a frame that matches comfort with the stiffness needed for solid climbing, sprinting, and endless-mile-busting.

ALL-ROAD/ALL-RACE: With race-inspired geometry and handling, the Krypton GF is as fast as it is comfortable.

ROOTED AND RESPONSIVE: Stable and predictable handling at speed, but with vibration-dampening layup that lets you feel sure, not shaken.

SMART INTEGRATION (DI2 KIT ONLY): Fully integrated cables optimised for usability and adjustability: 2cm adjustment range of stack and reach without having to bleed the brakes.
