

E-118⁺ TRI DISC

**FAST,
FIT,
FEARLESS**

315A - Black Frozen to Grey, Matte

At 250g lighter than the previous-generation E-118Next and equipped with discs, the E-118 Tri+ combines the razor-sharp handling and aerodynamic performance of a TT champion with tri-specific fit and functionality. Using Notio for our racecourse and velodrome testing has shown a gain of 8 to 10 watts at 50km/h over the E-118Next. The E-118 Tri+ Disc is our premium UCI-legal bike with the lean, low race frame of a TT champion – but tailored for triathletes.

LIGHTWEIGHT · At 250g lighter than its predecessor, the E-118 Tri+ is among the lightest tri bikes on the market. Working within the UCI limits on tube size pushed us to shave all unneeded bulk off the frame, for a lean, lightweight racer that leaves you fresh for the run.

DIALLED-IN HANDLING · Superb handling with the confidence of disc brakes. TT-level stiffness provides increased power transfer, and confident climbing and cornering comes through the lower position available on the base bar, with a 1.5cm increase in the saddle to handlebar drop over the E-118Next.

FIT AND POSITIONING · With new geometry to achieve a significantly lower front profile, our updated Oneness system offers a bar/stem system with armrest stack 2cm lower and grip position 4cm lower than the E-118Next. This allows athletes to achieve a low, aggressive position, and for smaller riders to find their perfect fit.
