

# KRYPTON GF

## FURTHER, FASTER – WITH A BIT MORE FUN

334A - Stellar Imp. Blue to Black, Gloss

This is the bike that Peloton Magazine says is: “equipped perfectly as a long miles campaigner, with plenty of performance on the hypoxic edge for the screaming fast club ride... under big watts is among the stiffest endurance bikes we’ve ridden.” Stable at all speeds, ready for all distances, eager for all surfaces – what are you waiting for?

**ENGINEERED FOR ENDURANCE** · Our Topological Compliance System gives you a frame that matches comfort with the stiffness needed for solid climbing, sprinting, and endless-mile-busting.

**ALL-ROAD/ALL-READY** · With race-inspired geometry and handling, the Krypton GF is as fast as it is comfortable – on any surface.

**ROOTED AND RESPONSIVE** · Stable and predictable handling at speed, but with vibration-dampening layup that lets you feel sure, not shaken.

**SMART INTEGRATION** · Fully integrated cables optimised for usability and adjustability: 2cm adjustment range of stack and reach without having to bleed the brakes. (Di2 and eTAP Kits). Also features our unique 3D+ system, offering three head tube extension heights for every frame size: 0mm, 15mm and 30mm, providing a proven stiffness gain of 5% at 15mm and 11% at 30mm, as compared to traditional spacers.

\* Only available with electronic configurations (eTap, Di2, WE)
